A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles. Check "Background graphics" in the print dialog.

Maintain

- **Significant accuracy beyond the arc:** Shooting 51% (25/49) from three-point range in the window (97th percentile in the league), alongside an improvement to 62% (8/13) in the last 3 games. This is a consistent figure that serves as a central offensive anchor for the small forward position.
- **High efficiency on drives:** Standing at 54% (20/37) for two-point shots in the window, with a jump to 82% (9/11) in the last 3 games, indicating good shot selection in the paint areas.

Improve

- **Early foul accumulation and trouble:** An average of 3.4 fouls per game (2nd percentile in the league), with out of 34 total fouls, 12 committed in quarter 4 (35%). Action: In individual defense in the final quarters, avoid making contact on the sideline and maintain arm's length distance. Goal: Reduce to no more than 2.0 fouls on average per game.
- **Extreme fluctuations in offensive contribution:** A PIR floor of 1.5 on weak evenings compared to 22.5 on strong evenings shows significant instability. Action: On evenings when the initial outside shots are not falling, focus on scoring through drives and drawing fouls. Goal: Maintain a minimum floor of 8.0 PIR even in weak games.
- **Turnovers in critical areas:** 15 total turnovers in the window, of which 5 turnovers (33%) are in quarter 3. Action: In half-court passes and initiating transition offenses in the third quarter, pass only to open lanes and check the opposing player's positioning. Goal: Reduce third-quarter turnovers to less than one turnover per game on average.

3-Week Plan

1. **The biggest leverage:** Foul management and defensive discipline. The data: 3.4 fouls on average per game and 35% of fouls concentrated in quarter 4. Action: Practice maintaining a step's distance in a static stance without reaching out to the ball handler. Goal: Finish the next 3 games with less than 3 personal fouls per game on average.
2. Outside shot focus. The data: Volume of 49 three-pointers in the window at the 97th percentile. Action: Increase the number of pull-up three-point shots to 6 attempts on average per game, while maintaining a controlled shooting range. Goal: Maintain a minimum of 45% accuracy on three-pointers at the increased volume.

3. Passing efficiency and turnover reduction. The data: 1.5 average turnovers with high concentration in quarter 3. Action: Avoid rotational passes under pressure and dribble twice backward before passing inside the paint. Goal: Lower total turnovers per game below 1.0 in the next three games.
