Last 10 games · 2026-05-24 to 2026-10-16

Games analyzed: 10 · Position: Point Guard (PG) · Report range: From 2026-05-24 to 2026-10-16

Data cross-referenced with the official Basketball Association box score (6 out of 10 games)

Analysis Summary

The drop in offensive volume in the recent window is proven by a decrease in average PIR to 3.7 in the last 3 games compared to 11.2 across the entire window. This means a significant hit to the ability to create opportunities following the move to Maccabi Rehovot, and a quick return to proactive playmaking via penetration is required.

Numbers by range

Last 5 | **Last 10** | Last 30

PTS **7.4**	REB **3.6** ↑	AST **3.6**

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	18.3	13.7	▼	39
PTS	7.4	4.7	▼	45
REB	3.6	3.0	▲	53
AST	3.6	0.7	▼	73
2P%	46% (12/26)	50% (2/4)	■	—
3P%	43% (6/14)	25% (1/4)	▼	—
Turnovers	1.5	1.0	▲	47
Fouls	1.9	1.7	▲	62
PIR	11.2	3.7	▼	58
±	3.4	4.0	▲	55

A 10-game window was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- **High passing efficiency and opportunity creation:** An average of 3.6 assists in the window (73rd league percentile) indicates excellent court vision and a full fit for the core role as a leading point guard.
- **Maintenance of game discipline and low fouls:** An average of only 1.9 fouls indicates low standard deviations and good consistency in half-court defense without getting into early foul trouble.

To Improve

- **Sharp decline in passing volume and assist contribution:** In the last 3 games, the assist average dropped to just 0.7 (compared to 3.6 in the window), as a result of a role change and the move to Maccabi Rehovot, which hurts the team's offensive fluidity.
- **Turnover concentration in the fourth quarter:** Out of 12 total turnovers in the window, 8 turnovers (67%) were concentrated in the fourth quarter, resulting in a drop in game management during clutch minutes.
- **Low perimeter shot volume:** Despite 43% (6/14) accuracy from three, this is a limited sample of fewer than 2 shots per game, preventing him from generating a consistent threat that opens up the defense via drives.

3-Week Plan

1. **The biggest leverage:** 3.6 assists in the window indicate high management capability. Action: Increase initiative in selecting key passes in the pick-and-roll early in the possession to return to the previous production level. Target: At least 3 assists per game in the next 3 games.
2. 8 out of 12 turnovers were concentrated in Q4. Action: Instead of managing the pace alone in clutch minutes, release the ball in the first seconds of the possession to the second PG or a supporting guard. Target: Maximum of 1 turnover in Q4 per game.
3. Perimeter shot volume stands at only 6/14. Action: Take at least 3 open outside shots in every game coming out of the pick-and-roll. Target: Maintain a minimum of 35% from beyond the arc on a volume of at least 3 attempts per game.

Per-Game Breakdown

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-05-24	Maccabi Ma'ale Adumim	22	9	**8**	**9**	**24**
2026-05-27	Hapoel Zefat	21	**18**	**6**	6	**21**
2026-07-20	Ironi Nahariya — Hapoel Migdal Jezreel - IBBA	**34**	**16**	3	**10**	**29**
2026-08-05	Hapoel Migdal Jezreel — Elitzur Yavne - IBBA	22	2	0	6	5
2026-09-18	Elitzur Yavne (Friendly)	18	2	**7**	1	6

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-09-23	Hapoel Hevel Modiin (Friendly)	12	7	3	0	8
2026-09-30	Maccabi Mendel Petah Tikva (Friendly)	13	6	0	2	8
2026-10-04	Elitzur Yavne (Friendly)	14	4	2	0	3
2026-10-09	Hapoel Haifa Neve Sha'anan (Friendly)	14	5	3	1	0
2026-10-16	Maccabi Kiryat Motzkin	13	5	4	1	8

Highlighted cells = one of the player's top 5 games this season in this metric (for fouls and turnovers - the lowest).
