Nittai Rosenberg

Last 10 games · 2026-05-12 to 2026-10-16

Games analyzed: 10 · Crossed club transition: Hapoel Migdal Jezreel (1 game) ← Maccabi Rehovot (2 games)

Data cross-referenced with the official Basketball Association box score (7 out of 10 games)

Analysis Summary

In his weakest quarter of games, he contributed an average of only 1.0 - almost no measurable contribution - compared to an average of 9.4 in the window and 22.5 on his best nights. This means the average relies on some games, not all of them.

The high volatility in output level reflects significant instability between game nights, where the overall average masks extreme gaps between peak performances and nights where the player is not felt on the court.

PIR	9.4 (94/10)	8.7 (26/3)	▼	—
±	+4.9	+1.0	▼	—

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- **High accuracy beyond the arc:** Shooting 47% (20/43) from three in the window, with a further improvement to 55% (6/11) in the last 3 games, indicating a consistent outside threat.
- **Ball protection on recent nights:** A drop to 0.3 turnovers on average in the last 3 games (compared to 1.6 on average in the window), indicating more cautious decision-making under pressure.

To Improve

- **Reducing volatility in offensive contribution:** The distribution gaps in the window range from a floor of 1.0 PIR to a ceiling of 22.5 PIR, with the player disappearing in a quarter of the games and failing to produce stable output.
- **Maintaining rebounding involvement:** A drop to an average of only 2.0 rebounds in the last 3 games (compared to 4.1 in the window), leading to a loss of control on the boards.
- **Mitigating fouls in clutch time:** A concentration of 37% of fouls in the 4th quarter (10 out of 27 total), which puts his availability in crunch time at risk.

3-Week Plan

1. **The biggest leverage:** 3 fouls in the 4th quarter out of 2.7 per game hurt your availability for crunch time minutes. Action: In one-on-one defense in final minutes, keep hands simple and avoid creating contact inside the paint. Target: Finish the game with a maximum of 1 foul in the 4th quarter.

2. During the window, an average of 1.6 turnovers per game was recorded with concentration in quarters 2 and 3. Action: Make a quick first pass immediately upon receiving the ball and do not dribble in crowded areas in the middle of the court. Target: Drop below realizing one turnover per game.

3. Rebound average dropped to 2.0 in the last 3 games compared to 4.1 in the window. Action: Box out the opposing player for a rebound on every outside shot and do not rely solely on reaching the ball. Target: Secure at least 4 rebounds per game in the next 3 weeks.

Per-Game Breakdown

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-05-12	A.S. Ashkelon / Kiryat Gat	**21**	7	4	**3**	2
2026-05-15	Elitzur Yavne	**24**	**16**	5	0	**14**
