Analysis Summary

PIR 8 · PIR Percentile 46 · Your 21st best game: Spot shooting efficiency and absolute ball security did not compensate for a significant decline in game management and assist distribution.

Game Snapshot

Min	Pts	2 Pointers	3 Pointers	Free Throws	PIR

League Percentiles: PIR 46 · Pts 43 · Reb 47 · Ast 12 · Stl 64 · Tov 85 · PF 76 | Versus My Average: Decreasing

To Maintain

- **Absolute ball security:** You recorded 0 turnovers in 12 minutes of play (85th percentile in the league in turnover prevention), while making safe decisions in transitions and set-offense management (Q1 01:07).
- **Aggressiveness and creating contact on drives:** You drew 2 fouls in 12 minutes of play, leading to 4 free throw attempts and quick point production from the line and mid-range in the first quarter (Q1 02:28, Q1 01:09).

To Improve

- **Assist distribution and game management:** You finished with 0 assists compared to a career average of 4.1 (a decrease of -4.1 assists, 12th percentile in the league). The lack of ball movement and absence of key passes directly contributed to the team's loss by a close margin of only 3 points (86:89) (Q3 00:48).
- **Load management and physical decline during stints:** The fatigue index points to a sharp decline in efficiency as minutes accumulate. You started stints at 100% from the field (3 points), dropped to 33% midway through the stint (1/3 from the field), and finished at 0% efficiency. This decline cost the team 2 critical field goal misses in the third quarter (Q3 00:48, Q3 00:08).
- **Free throw shooting percentage:** You shot only 50% from the line (2/4). These 2 misses (Q1 02:28, Q1 01:09) prevented the team from scoring 2 easy points in a tight game decided by a margin of 3 points.

This Week's Practice

1. **#1 - The Biggest Leverage:** Dropping to 0 assists compared to an average of 4.1 points to an excessive focus on personal finishing on drives. This week, practice in 5-on-5 drills driving to the center of the paint with the goal of drawing two defenders and kicking it out (Drive and Kick). Target for the next game: at least 4 assists or 8 key passes leading to a shot.
2. **Pace management and energy distribution during a stint:** Declining to 33% shooting midway through a stint requires effort regulation. Practice quick transitions from offense to defense and back to set offense this week, while deliberately slowing down the pace of the game (Pacing) in the half-court. Target for the next game: maintaining at least 50% from the field in minutes 4 to 7 of each stint.
3. **Free throw routine under fatigue:** Missing 2 critical free throws (50% accuracy). Practice at the end of each training session this week, under high physical fatigue, a

series of 10 free throws with a consistent routine of 3 dribbles and a deep breath. Target for the next game: at least 75% from the free-throw line (minimum 4 attempts).
