Analysis Summary

Shahar Shalmon shows a downward trend in offensive involvement and minutes volume over the last 10 games, with his scoring average dropping to 0.7 points in the last 3 games compared to a window average of 4.6 points. The decline primarily stems from reduced accuracy from beyond the arc alongside a decrease in playing time, while his rebounding contribution and maintenance of a low turnover ratio have remained steady, providing added value from the shooting guard position.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	17.7	13.0	▼	27
Points	4.6	0.7	▼	22
Rebounds	4.8	5.0	▲	69
Assists	1.0	0.3	▼	29
2PT%	65% (15/23)	50% (1/2)	▼	—
3PT%	23% (5/22)	0% (0/3)	▼	—

Metric	Average	Last 3 Games	Trend	League Percentile
Turnovers	0.7	0.3	▲	72
Fouls	2.3	0.7	▲	41
PIR	6.1	5.0	▼	34
±	-0.7	-5.3	▼	43

A 10-game window was selected because fewer games make the average too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), while more games blends different periods and roles.

Maintain

- **Efficient finishing in the paint:** 2-point shooting percentage stands at 65% (15/23) over the window, including consistent finishing on drives and offensive rebounds in 7 out of 10 games with low standard deviation in attempts.
- **Strong rebounding presence for position:** Averaging 4.8 rebounds across the window (69th percentile in the league) and increasing to 5.0 in the last 3 games, showing impressive consistency for a wing/guard.

Improve

- **Volume and accuracy beyond the arc:** Shooting 23% (5/22) from three over 10 games and 0% (0/3) over the last 3 games, translating to a loss of approximately 4.5 potential points per game on open missed shots.
- **Decline in offensive production volume:** A drop from 6.0 points per game in the first 7 games to 0.7 points in the last 3 games (13.0 minutes on average), hurting offensive flow and shot creation.
- **Fourth-quarter offensive output:** Play-by-play analysis shows that only 4% of total points in the window (just 2 points across 6 analyzed games) were scored in the decisive quarter, reducing late-game effectiveness.

3-Week Plan

1. **Biggest lever:** Improve shooting accuracy from beyond the arc. The data: 23% (5/22) from three in the window and 0% in the last 3 games. Action: Practice Catch & Shoot scenarios from the corners following dribble penetration, while maintaining stability in shooting mechanics. Target: Reach 33% from 3 (at least 1 of 3 per game) over the next three weeks.

2. Increase aggressiveness and draw fouls. The data: 65% (15/23) on 2-pointers but only 4 free throw attempts in 10 games (25%, 1/4). Action: Attack the rim in transition and off the pick-and-roll to create contact rather than settling for mid-range jump shots. Target: Draw at least 2 free throw attempts per game and improve free throw accuracy to 65%.
3. Fourth-quarter offensive involvement. The data: Only 2 points scored in the fourth quarter across analyzed timelines (4% total). Action: Execute backdoor and baseline cuts in the final quarter to receive the ball inside the paint. Target: At least one field goal attempt or free throw line trip in every fourth quarter.

Per-Game Breakdown

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-05-19	M.K. Otef Darom	18	3	6	2	1
2026-05-24	M.K. Otef Darom	20	4	6	0	2
2026-05-27	M.K. Otef Darom	21	6	8	2	9
2026-05-31	Ironi Nahariya	17	4	2	1	5
2026-06-04	Ironi Nahariya	27	12	6	1	16

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-06-08	Ironi Nahariya	21	9	4	2	13
2026-06-11	Ironi Nahariya	14	6	1	0	0
2026-09-08	Hapoel Midtown Jerusalem	11	0	3	0	1
2026-09-15	Hapoel Altshuler Shaham Be'er Sheva/Dimona	15	2	7	0	11
2026-09-27	Hapoel Ironi Eilat	13	0	5	0	3

Bold cells = One of the player's top 5 games this season in that category (for fouls and turnovers - the lowest).
