To Maintain

- **Absolute shooting percentage in the paint:** You finished with a 75% efficiency level (12/16) from the two-point range while making full use of your playing time (Q2 07:43, Q3 07:41). Continue to focus your shots in this area according to your role profile.
- **Capitalizing on opponent fouls:** You drew 5 fouls and shot 100% from the line (5/5) while maintaining high involvement on offense (Q1 02:06, Q3 03:24). Stay aggressive in creating contact against the opponent's defense.

To Improve

- **Defensive and offensive rebounding:** You recorded only 4 total rebounds (2 defensive, 2 offensive) compared to a career average of 7.2 (minus 3.2), a figure in the 59th percentile only. Action: Slip into boxing-out lanes earlier and ensure a proper box-out immediately upon the opponent's shot. Target: Increase total rebounds to at least 6 in the next game (Q1 05:34, Q3 06:15).
- **Maintaining concentration in passing at the end of stints:** You committed 2 turnovers in the final quarter due to poor passes (Q4 06:32, Q4 02:24) that cost the team crucial possessions. Action: Release the pass a second earlier or choose a short safety pass during late-game fatigue. Target: Zero passing turnovers in the final quarters.

This Week's Practice

1. **The Biggest Leverage:** Practice repositioning and battling for defensive and offensive rebounds under fatigue, with the goal of returning the rebound average to the range of 6-8 per game.
2. Practice short passes and quick decision-making under defensive pressure in the final minutes of long stints to reduce turnovers.
3. Maintain high and accurate shooting volume from two-point range while avoiding unnecessary dribbling inside the paint.
