

Yam Madar

Last 10 Games · 2026-06-02 to 2026-09-27

Games in Analysis: 10 · Position: Shooting Guard (SG) · Mid-window bold club transfer (Hapoel IBI Tel Aviv to Maccabi Rapyd Tel Aviv)

Data cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

Yam Madar demonstrates high offensive efficiency in the window with an average PIR of 21.4 and 46% from three-point range (27/59), while undergoing a drastic role change following his club transfer between Hapoel IBI Tel Aviv and Maccabi Rapyd Tel Aviv. In practice, this means excellent offensive leadership ability and stability in shooting percentages, alongside the need to adjust shot volume and reduce turnovers in crucial quarters.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	28.4	22.7	▼	35
Pts	17.5	15.0	▼	91
Reb	3.3	3.0	▼	50
Ast	5.4	6.0	▲	87
2P %	55% (30/55)	69% (9/13)	▲	—
3P %	46% (27/59)	38% (6/16)	▼	—
Turnovers	1.9	1.7	▲	35
Fouls	1.1	1.3	▼	94
PIR	21.4	19.7	▼	87
±	5.0	9.3	▲	76

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Preserve

- **Outside and Inside Shooting Efficiency:** Maintaining a high percentage of 46% (27/59) from three and 55% (30/55) from two indicates high consistency in shot selection and high accuracy, with a low standard deviation compared to the last three games (38% from three).
- **Playmaking and Stability in Assists:** An average of 5.4 assists in the window which rose to 6.0 in the last three games, showing consistent court vision and stable offensive contribution even after the transition between teams.

Improve

- **High-Focus Turnover Management:** A total of 19 turnovers were recorded in the window, of which 32% were in the 1st quarter and 32% in the 3rd quarter, which hurts the offensive flow and generates easy transition points for the opponent.
- **Foul Reduction in Critical Stages:** 45% of all fouls in the window (5 out of 11) were committed in the 3rd quarter, causing foul trouble and limiting playing time in decisive moments.
- **Adjustment of Beyond-the-Arc Shot Volume:** Despite the high shooting percentages, there is a need to properly regulate three-point shots according to fluctuating playing minutes (dropping to 22.7 minutes in the last three games).

3-Week Plan

- 1. **The Biggest Leverage:** 1.9 turnovers per game on average hurt pace management. Action: When bringing the ball up in the first two minutes of each quarter, avoid unnecessary dribbling and release the first pass within 3 seconds. Target: Lower actual average turnovers to less than 1.5 per game.
- 2. Third Quarter Foul Management: 5 fouls accumulated in the 3rd quarter during the window. Action: In man-to-man defense at the start of the second half, maintain an upright stance and avoid unnecessary contact in the early seconds of the shot clock. Target: Zero fouls in the 3rd quarter over the next game week.
- 3. Workload and Minute Management: With an average drop to 22.7 minutes in the last 3 games due to the club transfer, the required action is increased aggressiveness and movement off the ball during short stints. Target: Maintain a minimum Performance Index Rating (PIR) of 18 even under a shortened rotation.

Game-by-Game Breakdown

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-06-02	Maccabi Tapuzina Rishon LeZion	22	13	3	2	18
2026-06-04	Maccabi Tapuzina Rishon LeZion	25	19	2	5	25
