Maintain

- **Scoring Creation and Key Passes:** You finished with 7 assists (94th league percentile) and 0 turnovers in 27 minutes, maintaining a direct connection to shooters like Netai Rosenberg (Q1 09:05, Q1 08:31). Maintain this quick decision-making even during long stints (Q2 08:41).
- **Offensive Efficiency in the Paint and Mid-Range:** You shot at a high percentage out of controlled volume (4/6 on two-pointers, 67%), including an accurate transition layup in the 3rd quarter (Q3 09:47). Keep generating from drives rather than forcing perimeter shots.

Improve

- **Early Foul Trouble:** You accumulated 3 personal fouls as early as the 3rd quarter (Q1 05:43, Q3 09:00, Q3 07:42), which limited your aggressiveness defending the ball-handler. Action: When defending drives, stay at arm's length without making unnecessary contact with the leading hand. Target: No more than one foul per half.
- **Maintaining Productivity at the End of Stints:** The fatigue index showed a drop in shooting efficiency from 100% at the start of a stint to 33% at its end (Q3 04:48). Action: Demand earlier substitutions when fatigue accumulates to prevent field goal misses at the end of the minute cycle. Target: Maintain a minimum of 50% efficiency even in the final minutes of the stint.

This Week's Drill

1. **The Biggest Leverage:** Practice defending the ball-handler without using hands in the early quarters. Action: Maintain a low defensive stance and lowered center of gravity instead of reaching with hands (Q1 05:43). Target: Finish the game with a maximum of 2 personal fouls.
2. Practice shooting under accumulated fatigue at the end of a stint. Action: Take 50 shots approaching rest time in individual training sessions (Q3 04:48). Target: Maintain at least 45% accuracy on these shots.
3. Practice drives to the rim or passing without unnecessary dribbles. Action: Limit structured dribbles to a maximum of 3 before a pass or shot (Q1 09:05). Target: Preserve or improve the assist-to-turnover ratio.
