A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- **Key passing and creativity:** Contributes an average of 5.2 assists in the window (78th percentile in the league), with a peak of 13 assists against Bnei Penlink Herzliya, demonstrating high-level playmaking ability when the pace suits.
- **Maintaining consistent positive plus-minus:** Average plus-minus of +7.0 in the window (+9.1 in 9 verified games), reflecting a positive team contribution even on nights when individual stats fluctuate.

To Improve

- **Three-point shot volume and accuracy relative to position:** Takes only 1.5 threes per game on average (5/11 in the window, 45%), placing him at only the 23rd percentile in the league for a guard. Action: Increase volume to 3 threes per game in open catch-and-shoot situations. Target: Maintain at least 35% accuracy out of at least 30 attempts in the next window.
- **Offensive production in the first quarters:** Records an average of only 0.7 points in Q1 (with 0 out of 7 games having 2+ quick fouls, but lacking sufficient scoring involvement). Action: Take on at least 2 initiated shots in the first 6 minutes of the game. Target: Raise Q1 average points from 0.7 to 2.5 points.

- **Efficiency rating (PIR) stability and floor nights:** Drops to -4.5 on his weak nights and records a negative PIR in several games during the window. Action: When the game is not flowing offensively, focus on ball-handler ball pressure on defense and ball movement without forcing tough shots. Target: Reduce negative PIR games to zero in the next sample.

3-Week Plan

1. **The biggest leverage:** 5.2 assists per game prove your court vision. Action: In the first week, on every pick-and-roll in the first 4 minutes, locate the player in the corner or the rolling big man instead of looking for an individual shot. Target: Maintain a minimum of 5 assists per game without increasing turnovers above 1.5.
2. Foul management and stints: You accumulated 9 fouls in Q4 (39% of total fouls) due to late defensive pressure. Action: In the second week, when defending the ball-handler in the final 5 minutes of the quarter, maintain arm's length instead of making unnecessary physical contact. Target: Maximum of 1 foul in Q4 in every game.
3. Shot selection and mid-range efficiency: Shooting 50% on 2s (9/18) but showing an inaccurate pull-up. Action: In the third week, avoid mid-range pull-up shots when not completely open, and convert them into drives to the dunk or passes out. Target: Raise 2-point shooting percentage to at least 55% (out of a sample of 10 shots).
