A window of 10 games was selected because below this size the average is too noisy (standard error 3.2 points in 5 games vs 2.2 in 10), and above it mixes different periods and roles. His minutes ranged from 6 to 34 · part of the spread is rotation, not the player.

Maintain

- **Elite playmaker vision and execution:** Averaging 3.9 assists per game (84th percentile) with a recent surge to 5.7 assists over the last 3 games, anchored by consistency in orchestrating the pick-and-roll and finding cutters.
- **Efficient inside finishing when utilized:** Shooting 58% on two-pointers (14/24) across the window, proving highly reliable when driving to the rim within the flow of the offense.

Improve

- **Foul accumulation and timing:** Averaging 2.7 personal fouls per game (17th percentile) with a heavy concentration of 11 fouls in the 4th quarter, leading to defensive passivity or early fouling out down the stretch.
- **Turnover spikes under pressure:** Committing 1.9 turnovers per game (28th percentile) with 10 of 17 total window turnovers concentrated in the 4th quarter due to ball-handling under late-game pressure.
- **Low 3-point volume:** Shooting 39% from beyond the arc on a modest 9/23 total makes across 9 games, requiring an expanded volume to stretch opposing defenses effectively as a primary PG.

3-Week Action Plan

1. **Control 4th quarter fouling:** 11 personal fouls in the 4th quarter compromised your closing minutes. Action: In defensive stance during late quarters, maintain arm-length distance instead of reaching in isolation. Target: Finish games with no more than 2 total fouls in the second half.
2. **Protect the ball in late possessions:** 10 turnovers in the 4th quarter hurt offensive efficiency. Action: Utilize early-clock pace and simple handoffs instead of heavy isolation dribbling when pressured. Target: Reduce 4th quarter turnovers to under 1 per game.
3. **Expand perimeter volume safely:** Current 3-point volume stands at 2.6 attempts per game (9/23). Action: Take 1 additional catch-and-shoot triple per game out of pick-and-

roll kick-outs. Target: Maintain 35%+ accuracy while increasing total window attempts to 3+ per game.
