

Brandon Tabb

Last 10 Games · 2026-04-28 to 2026-10-23

Games Analyzed: 10 | Position: Shooting Guard (SG)

Data cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

Brandon Tabb displays leading offensive productivity in this window with an average PIR of 32.0 and 30.1 points per game, backed by a 100th league percentile. Alongside this, high intensity is evident in crunch time and at the free-throw line, reflected in high shooting percentages and a positive +8.3 differential.

Offensive capability remains at high consistency, but turnover volume should be reduced and foul trouble managed efficiently to maintain game flow without losing valuable minutes on the bench.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	31.6	26.3	▲	92
Pts	30.1	27.7	▲	100
Reb	5.8	4.7	▲	80
Ast	4.6	3.3	▲	90
2P%	54% (38/71)	46% (6/13)	■	37
3P%	36% (28/77)	60% (6/10)	▲	53
Turnovers	2.8	1.3	▼	13
Fouls	3.3	4.0	▲	6
PIR	32.0	28.3	▲	100
±	8.3	7.3	▲	95

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- Excellent accuracy from the free-throw line with 90% (55/61) on average in the window and only one foul recorded out of 2 fouls in the first 6 minutes across 7 examined games.
- High offensive efficiency backed by a PIR of 32.0 per game and a 100th league percentile, alongside a positive plus-minus of +8.3 and relatively low standard deviation in offensive contribution.

To Improve

- Recording an average of 2.8 turnovers per game in the window, where in 6 games pace drops and high-concentration turnovers occurred in the second quarter (7 turnovers), creating halts in team momentum.
- Foul burden of 3.3 fouls on average per game in the window, with a high concentration of fouls occurring in the third quarter (8 fouls), requiring maintaining distance and preventing unnecessary contact.
- Relatively low 2-point percentage standing at 54% (38/71) and dropping to 46% (6/13) in the last 3 games, alongside a 37th league percentile index in this category.

3-Week Plan

1. **The Biggest Lever:** Maintain arm's-length distance when defending the ball handler in the first and third quarters to avoid getting into foul trouble, in response to the data of 3.3 fouls on average in the window. Target: No more than 1 foul by halftime in each game.
2. Practice short, precise passes under pressure to reduce turnovers from 2.8 per game in the window to below 2.0, focusing on neutralizing turnovers in the second quarter. Target: Maximum 2 turnovers per game.
3. Increase outside shot volume in line with the hot shooting percentage of 60% (6/10) in the last 3 games, while maintaining precise shot selection from midrange. Target: Maintain a minimum of 35% accuracy from beyond the arc in every upcoming game.

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-04-28	Maccabi Ma'ale Adumim	32	**36**	6	3	**42**
