Analysis Summary

In his weakest quarter of games he contributed an average of only 1.0 - almost no measurable contribution - compared to an average of 11.5 across the window and 26.5 on good evenings. Meaning the average relies on some games, not all. His minutes ranged between 6 and 34 · part of the variance is rotation rather than the player.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	19.5	25.7	▲	44
Points	8.7	12.0	▲	59
Rebounds	3.4	3.0	■	52
Assists	4.1	7.3	▲	84
2-Point %	64% (16/25)	45% (5/11)	▼	—
3-Point %	38% (9/24)	50% (2/4)	▲	—
Turnovers	2.1	2.7	▼	24
Fouls	2.6	2.7	■	18
PIR	11.5	18.3	▲	67

Metric	Average	Last 3 Games	Trend	League Percentile
±	0.7	-6.0	▼	54

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **Playmaking and Key Passes:** Displays high consistency in assists with an average of 4.1 in the window and a jump to 7.3 in the last 3 games, including an impressive 84th league percentile signaling focused contribution at the point guard position.
- **Efficiency Finishing Drives:** Maintains a strong 2-point shooting percentage of 64% (16/25), pointing to good shot selection in the paint area without extreme fluctuations in baseline efficiency.

Improve

- **Reducing Early Turnovers:** 32% of turnovers are concentrated in the first quarter (6 out of 19 total), which hurts the team's game-opening pace. Action: Avoid unnecessary dribbling in the first 8 seconds of the shot clock and pass immediately to the backcourt. Target: No more than one turnover in the first quarter of every game.
- **Consistency Within the Rotation:** Extreme fluctuations in playing minutes (ranging between 6 and 34 minutes) create a low contribution floor of 1.0 PIR on weak evenings. Action: Maintain proactive offensive involvement through easy passes even when the early minutes do not develop as planned. Target: Maintain a minimum of 5.0 PIR in every first half.
- **Increasing Outside Shot Volume:** Shooting 38% (9/24) from three but with a relatively low shot volume per game. Action: Shoot three-pointers only from catch-and-shoot situations off a pass and increase the number of attempts. Target: Reach a minimum of 3 three-point attempts per game at percentages not dropping below 35%.

3-Week Plan

1. **Week 1 - Pressure and Turnover Management:** Focus on reducing turnovers in the first quarter. Maintain clean dribbling, avoid high-risk passes across the court, and achieve a target of zero turnovers in the first 6 minutes of the game.
2. **Week 2 - Expanding the Threat Range:** Increase outside shot volume in catch-and-shoot situations without sacrificing paint drive efficiency (maintaining over 60% on two-pointers).

3. **Week 3 - Full Output Stability:** Focus on maintaining a positive and stable PIR index in every quarter, utilizing the point guard position to manage game pace and raise the number of assists to a level of over 6 per game.

Per-Game Breakdown

Date	Opponent	Min	PTS	REB	AST	PIR
2026-04-24	Maccabi Ma'ale Adumim	23	9	6	3	11
2026-04-28	A.S. Ramat Hasharon Yarkon Field	17	8	1	0	2
2026-05-08	Maccabi Petah Tikva Elitzur	19	11	4	0	11
2026-05-12	A.S. Ashkelon / Kiryat Gat	13	5	2	2	4
2026-05-15	Elitzur Yavne	6	2	1	0	0

Date	Opponent	Min	PTS	REB	AST	PIR
2026-05-19	Maccabi Haifa	18	7	3	5	8
2026-05-24	Maccabi Ma'ale Adumim	22	9	8	9	24
2026-05-27	Hapoel Safed / Galil Daniel	21	18	6	6	21
2026-07-20	Hapoel Nahariya — Hapoel Migdal HaEmek/Jezreel - IBBA	34	16	3	10	29
2026-08-05	Hapoel Migdal HaEmek/Jezreel — Elitzur Yavne - IBBA	22	2	0	6	5

Highlighted cells = one of the player's top 5 games this season in this metric (for fouls and turnovers - the lowest).
