

Nitai Rosenberg

Last 10 games · 2026-04-17 to 2026-09-15

Games analyzed: 10 | Position: Small Forward (SF)

Data cross-referenced against the official Israel Basketball Association box score (9 out of 10 games).

Executive Summary

Nitai Rosenberg exhibits a surging scoring trend backed by 51% three-point accuracy, anchoring his offensive impact in the recent window. The sharp uptick in perimeter production elevates his offensive ceiling, though high volatility and late-game foul accumulation require tighter defensive discipline moving forward.

A window of 10 games was chosen because below this the average is too noisy (standard error 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles. Note: background graphics must be enabled in browser print settings.

To Preserve

- **Elite perimeter efficiency (51% 3P on 49 attempts, league 99th percentile):** Maintained high shooting accuracy across the 10-game window, anchoring floor spacing from the small forward position with reliable volume.
- **Consistent offensive involvement in the last 3 games:** Escalated production to 18.7 points and 24.3 PIR with stable decision-making, matching low turnover rates (1.7 TO) despite increased minutes.

To Improve

- **Late-game foul accumulation (38% of personal fouls occur in Q4):** Committed 13 of 34 total fouls in the final quarter across the window, risking availability in crunch-time minutes.
- **Low floor volatility (1.5 average PIR in weakest quarters):** Swings heavily from high ceiling games (28.5 PIR) down to near-invisible output in struggling stretches, indicating a need for consistent early-game engagement.
- **Sub-optimal free throw volume (71% FT, 10/14):** Generates low foul-drawing frequency relative to his driving role as an SF, limiting easy points from the line.

3-Week Action Plan

1. **Manage Q4 defensive contact:** 13 personal fouls in the fourth quarter across the window forced defensive conservatism. Action: contest drivers vertically with arms straight up rather than reaching in the final 6 minutes. Target: max 2 fouls in Q4 per game.
2. **Expand aggressive drives to draw fouls:** Only 14 free throw attempts across 10 games leaves easy points on the table for an SF. Action: initiate contact chest-first on drives

instead of avoiding the shot blocker. Target: increase free throw attempts to 3+ per game.

3. **Establish early offensive rhythm:** Q1 accounts for only 16% of total points (21 of 131), leading to slow starts. Action: actively seek catch-and-shoot 3s or early transition lanes in the first 5 minutes. Target: secure at least 4 points in Q1.
