

Nitai Rosenberg

Last 10 games · 2026-04-17 to 2026-09-15

Games analyzed: 10 · Position: Small Forward (SF) · Role: Primary Slasher

Data cross-referenced with official Israel Basketball Association box scores (9 out of 10 games verified).

Executive Summary

In his weakest quarter of games he produced only 1.5 on average, next to no measurable contribution, against 12.0 in the window and 28.5 on good nights. The average rests on some games, not all of them.

Window Overview (Last 10 games)

Metric	Average	Last 3	Trend	League Percentile
MIN	21.1	23.7	▲	52
PTS	13.1	18.7	▲	81
REB	4.5	5.7	▲	69
AST	1.4	1.7	▲	44
2P%	58% (23/40)	86% (12/14)	▲	59
3P%	51% (25/49)	62% (8/13)	▲	99
TO	1.7	1.7	■	33
PF	3.4	2.7	▼	2
PIR	12.0	24.3	▲	67
±	4.6	6.0	▲	88

A 10-game window was selected because shorter samples are too noisy (standard error of 3.2 points in 5 games versus 2.2 in 10), while longer samples blend different periods and roles.

Strengths to Preserve

- **Elite perimeter gravity matched with high volume:** Shooting 51% (25/49) from beyond the arc across the window, placing him in the 99th percentile of the league. This exceptional conversion rate on nearly 5 attempts per game forces defenses to close out aggressively, opening up his primary slashing lanes.
- **Elite finishing efficiency inside:** Converting at 58% (23/40) on two-point attempts within a small forward role, rising to 86% (12/14) over the last 3 games. This high conversion is coupled with low variance in shot selection and strong night-to-night scoring output on nights when the offense runs through him.

Areas for Development

- **Foul accumulation in the final quarter:** Picking up 38% (13 out of 34 total) of his fouls in the 4th quarter across the 10-game window. This late-game foul accumulation compromises his defensive aggressiveness and risks critical minutes down the stretch.
- **Rebounding consistency for position:** Averaging 4.5 rebounds (69th percentile for an SF) with notable fluctuation from 7 boards down to zero. As a starting small forward, securing defensive glass is part of the core role and requires higher baseline tracking on missed shots.
- **Playmaking assist-to-turnover ratio:** Delivering 1.4 assists against 1.7 turnovers per game (33rd percentile in league TO protection). While scoring volume is high, distribution out of slashes needs tighter passing decisions to reduce live-ball turnovers.

3-Week Action Plan

1. **Foul discipline in late stretches:** 38% of total fouls occur in the 4th quarter. Action: In defensive rotations during the final frame, maintain verticality and keep arms back instead of reaching when tired. Target: Limit 4th quarter fouls to no more than 1 per game.
2. **Defensive rebounding positioning:** 4.5 rebounds in 21.1 minutes. Action: On opponent perimeter shots, immediately box out your direct matchup before tracking the ball. Target: Maintain a consistent floor of at least 5 rebounds per game over the next 3 weeks.
3. **Turnover control on drives:** 1.7 turnovers per game. Action: When attacking the paint, pick up your dribble earlier if help defense collapses and kick out to the perimeter

rather than forcing contested passes. Target: Reduce total turnovers to under 1.5 per game.

Game-by-Game Breakdown

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-04-17	Hapoel Haifa	24	20	3	0	16
2026-04-24	Maccabi Ma'ale Adumim	23	11	7	2	4
2026-04-28	Ace. Ashkelon	18	2	3	4	1
2026-05-08	Maccabi Petah Tikva Elitzur	12	9	0	0	4
2026-05-12	Hapoel Safed / Galil Daniel	21	7	4	3	2

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-05-15	Elitzur Yavne	24	16	5	0	14
2026-05-19	Maccabi Haifa	18	10	6	0	6
2026-05-24	Maccabi Ma'ale Adumim	20	13	5	2	16
2026-05-27	Hapoel Safed / Galil Daniel	23	20	5	3	27
2026-09-15	Elitzur Netanya	28	23	7	0	30

Highlighted cells = one of the player's top 5 games this season in that metric (for fouls and turnovers, the lowest ones).
