Maintain

- **Playmaking and Assists:** Finished with 7 assists (93rd percentile in the league, +2.7 above career average), including 4 assists in the first quarter and effective cooperation with Roman Sorkin (Q1 01:13, Q4 09:21). Maintain this decision-making in upcoming games.
- **High Team Plus/Minus:** Registered a plus/minus of +19 (100th percentile on the roster) in 19 minutes of play, leading the team to a significant advantage while you were on the court (Q4 09:21, Q2 00:02).

Improve

- **Focused Shot Volume:** Shot only 4 times from beyond the arc (2/4) and 4 times from two-point range (2/4), which is a low volume for the shooting guard position. Action: Increase the number of Catch-and-Shoot attempts to at least 7 in the next game, especially in transition situations (Q2 09:41, Q3 02:32). Target: Maintain an efficiency of over 40% on a volume of 6 or more three-pointers.
- **Stint Optimization and Opening Accuracy:** Registered 0 points at the start of stints (0/1) due to early misses such as in Q1 08:53. Action: Increase concentration on initial shots upon entering the court to generate immediate momentum for the team. Target: Achieve at least one point or assist in the first 90 seconds of every stint entry.

Weekly Practice

1. **Biggest Leverage:** Increasing the three-point shot volume to at least 6 attempts per game, while maintaining quick shooting mechanics after a pass (Q2 00:02, Q3 02:32). Target: At least 3 successful three-pointers in the next game.
2. Practicing finishing drives against a packed defense in the paint (Q1 08:53, Q2 00:51), aiming to raise lay-up conversion rates from 50% to over 70%. Target: Fewer misses under the basket on personal attempts.
3. Maintaining defensive pressure and generating steals (2 steals in the game, 85th percentile) without committing unnecessary fouls (only 1 foul, Q1 02:14). Target: Maintain a foul-to-minutes ratio of below 0.1 per game.
