Executive Summary

In his weakest quarter of games he produced only 1.0 on average, next to no measurable contribution, against 11.5 in the window and 26.5 on good nights. The average rests on some games, not all of them. His minutes ranged from 6 to 34 · part of the spread is rotation, not the player.

Window Overview (Last 10 games)

Metric	Average	Last 3 Games	Trend	League Percentile
MIN	19.5	25.7	▲	44th

Metric	Average	Last 3 Games	Trend	League Percentile
±	+0.7	-6.0	▼	54th

A 10-game window was selected because smaller samples are volatile (standard error 3.2 PTS in 5 games vs 2.2 PTS in 10), while wider ranges mix distinct rotational roles.

Strengths to Maintain

- Elite distribution and playmaking vision: Lempert posted an 84th percentile league ranking in assists with 4.1 AST overall across the window, escalating to 7.3 AST over his last 3 games. He recorded 5 or more assists in 5 of his last 6 appearances, highlighted by a 10-assist, 5-steal outing against Hapoel Nahariya on 2026-07-20.
- High-efficiency interior scoring: Lempert converted 64% (16/25) inside the arc during the 10-game window. His rim-finishing consistency generated 61% of his total scoring output (42 of 69 total points) during 4th quarters, demonstrating dependable late-game shot creation off drives.

Areas for Improvement

- Early-possession decision making and late-game live-ball turnovers: Lempert committed 19 turnovers across 9 tracked games (2.1 TO average, 24th percentile). 79% of all turnovers occurred in Q1 (6) and Q4 (9), surrendering an estimated 1.1 points per possession directly off transition opportunities.
- Foul concentration in middle and closing quarters: Lempert accumulated 22 fouls, with 18 of them (81%) clustered across Q2 (8 fouls, 36%) and Q4 (10 fouls, 45%), leading to rotation disruption and sub-20 minute allocations in 5 of 10 games.
- Low perimeter attempt volume: Converting 38% (9/24) from three across 10 games (2.4 attempts per game), Lempert took 1 or fewer 3-point attempts in 4 separate contests, limiting backcourt floor spacing against drop coverage.

3-Week Action Plan

1. **#1 - Highest Leverage:** 15 of your 19 turnovers occurred in Q1 and Q4 due to forced kickouts and live-ball handle slips. Execute primary pick-and-roll reads with two-handed chest passes and eliminate baseline jump-passes under duress. Target: reduce total turnovers from 2.1 to 1.3 or fewer per game over the next 5 appearances.
2. 81% of your personal fouls (18 of 22) occurred in Q2 and Q4, resulting in 4 games with 3+ fouls. Maintain legal guarding position with a 1-meter chest cushion on closeouts to eliminate hand-checking. Target: record 2 or fewer personal fouls per contest and increase floor time to 24+ minutes.

3. You converted 38% (9/24) from 3-point range but attempted only 4 total triples over your last 3 games (1.3 attempts per game). Increase baseline catch-and-shoot 3-point volume off drive-and-kicks. Target: elevate perimeter attempts from 2.4 to 4.0 per game while maintaining at least 35% 3P%.
