This Week's Drills

1. **The Biggest Leverage:** Practice on-ball defense and pressure dribbling under double-team for 15 minutes in every individual workout, aimed at lowering turnovers to no more than 1 per game.
2. Practice finishing drives in the second line with your non-dominant hand against a tall defender, to improve conversion percentages in the paint outside the restricted area.

3. Focus on controlled mid-range shooting after receiving a rotational pass, and completely avoid long-range jumpers or three-pointers without a clear numerical advantage in the stint.
