

Shahar Shalmon

Last 10 games · 2026-05-24 to 2026-10-05

Games analyzed: 10 | Position: Shooting Guard (SG)

Data cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

The player demonstrates high efficiency near the rim alongside a very limited three-point volume and a decline in plus-minus during the current window, evidenced by a drop to 2.0 points and 0% from 3-point range over the last 3 games. Practically speaking, this highlights a critical need to increase perimeter shot volume and generate comfortable scoring opportunities via isolation or off screens, without losing the high conversion rate on layups (77% (17/22)).

Window Overview (Last 10 games · 2026-05-24 – 2026-10-05)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	16.9	12.7	▼	15
PTS	4.7	2.0	▼	15
REB	4.4	4.7	▲	68
AST	0.9	0.7	▼	24
2P%	77% (17/22)	60% (3/5)	▼	—
3P%	18% (4/22)	0% (0/5)	▼	—
TOV	0.7	0.7	■	79
PF	1.9	0.0	▲	62
PIR	6.3	5.7	▼	21
±	-2.9	-7.3	▼	21

A 10-game window was chosen because anything below that is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), while anything above it blends different periods and roles.

Maintain

- **Extremely high finishing efficiency near the rim:** 77% (17/22) on 2-point shots during the window (and 60% (3/5) in the last 3 games), indicating smart shot selection and proper execution on drives.
- **Low fouls and game discipline:** An average of only 1.9 fouls in the window and 0.0 in the last 3 games, including zero games with 2+ fouls in the first 6 minutes of the 1st quarter (0 out of 10), allowing for clean minutes on the floor.

Improve

- **Three-point volume and accuracy:** Only 18% (4/22) from beyond the arc in the window and 0% (0/5) in the last 3 games out of 22 total attempts, which hurts the team's floor spacing at the SG position.
- **Offensive production in late quarters:** Only 2 points out of 47 total were scored in the 4th quarter (4%), indicating an offensive disappearance in crunch time.

- **Turnovers at critical timing:** 3 out of 7 turnovers (43%) are concentrated in the 3rd quarter, creating momentum halts for the team at the start of the second half.

3-Week Plan

1. **The biggest leverage:** 18% (4/22) on three-pointers requires a shift from difficult shots off the dribble to shots out of movement and pick-and-roll coordination. Action: In transition offenses and catch-and-shoot situations, practice targeted shooting of 50 daily shots from the corners of the court. Goal: Raise the 3-point percentage to 30% or higher over the next 3 games.
2. 2 turnovers in the 2nd quarter and 3 turnovers in the 3rd quarter halted your transition game during the window. Action: On passes out of penetration to the middle, release the ball 0.5 seconds earlier without waiting for the defense to collapse. Goal: Lower the second-half turnover average to less than 0.3 turnovers per game.
3. Only 2 points in the 4th quarter across the entire window hurt your contribution in closing minutes. Action: Ask the point guard for isolation or off-screen plays at the start of the 4th quarter to get early touches. Goal: Produce at least 3 cumulative points in the 4th quarter within the next 3 games.

Per-Game Breakdown

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-05-24	M.K. Otef Darom	20	4	6	0	2
2026-05-27	M.K. Otef Darom	21	6	8	2	9
2026-05-31	Ironi Nahariya	17	4	2	1	5
2026-06-04	Ironi Nahariya	27	12	6	1	16
2026-06-08	Ironi Nahariya	21	9	4	2	13

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-06-11	Ironi Nahariya	14	6	1	1	0
2026-09-08	Hapoel Midtown Jerusalem	11	0	3	0	1
2026-09-15	Hapoel Altshuler Shaham Sderot/Dimona	15	2	7	1	11
2026-09-27	Hapoel Ironi Eilat	13	0	5	0	3
2026-10-05	Maccabi Cnaan Group Ramat Gan	10	4	2	1	3

Highlighted cells = one of the player's top 5 games this season in that metric (for fouls and turnovers - the lowest).
