Games in Analysis: 10 · Small Forward (SF) · Club Transfer (Hapoel Haifa Neve Sha'anan Shoval ← Elitzur Shomron)

The data was cross-referenced with the official Basketball Association box score (9 out of 10 games)

In his weakest quarter of games, he contributed an average of only 4.5 - almost no measured contribution - compared to an average of 15.8 in the window and 38.0 on good nights. This means the average relies on some games, not all of them.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	27.1	32.3	▲	77
PTS	16.1	25.3	▲	89
REB	5.1	6.0	▲	74
AST	2.7	3.0	▲	68
2P%	61% (48/79)	74% (29/39)	▲	73
3P%	35% (14/40)	31% (4/13)	■	50
TO	1.4	2.0	▼	45
PF	2.0	2.0	■	43
PIR	15.8	25.0	▲	79
±	-1.9	9.7	▲	28

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- High efficiency from mid-range and the rim area with 61% (48/79) in the window, alongside an improvement to 74% (29/39) in the last 3 games, while maintaining a stable personal foul average of 2.0.
- High rebounding contribution with 5.1 per game (74th percentile) and well-controlled fouls in the first quarter, with no instances of 2+ fouls in the first 6 minutes of the game out of 9 checked games.

To Improve

- Sharp fluctuations in production between games: a gap between a floor of 4.5 PIR on average in the worst quarter and a ceiling of 38.0 PIR, indicating disappearance on less good nights.
- High turnover concentration in the second quarter: 7 out of the 13 turnovers in the window (54%) occurred in this quarter, hurting team stability.
- Low shot volume beyond the arc with 35% (14/40) in the window and 31% (4/13) in the last 3 games, requiring increased offensive initiative outside the paint in accordance with the small forward position.

3-Week Plan

1. **The Biggest Leverage:** 54% of turnovers (7 out of 13) are concentrated in the second quarter. Action: In transition offenses and passing around the middle

minutes of the second quarter, choose a simple pass or a single dribble move instead of driving into a crowded area. Target: No more than one turnover in the second quarter per game.

2. The average points in the fourth quarter stand at only 2.0 points (12% of points in the window). Action: Increase your involvement in drives to the basket in the final quarter and maintain arms-length in defense to avoid being benched. Target: Raise fourth-quarter production to at least 4 points on average.
3. Three-point volume of 14/40 (35%) in the window. Action: As a small forward, create at least 4 outside shots for yourself in each game out of Catch & Shoot situations. Target: Maintaining a percentage above 35% with a minimum volume of 5 attempts per game.
