Maintain

- **High offensive efficiency inside the arc** (Q2 07:49, Q3 06:15): You made 17 out of 23 two-point shots, representing 74% accuracy on 23 attempts.
- **Full utilization of the free throw line** (Q3 02:57): You shot 2 out of 2 free throws over 35 minutes of play, alongside drawing 4 fouls from the opponent.

Improve

- **Three-point shot volume** (Q1 04:45, Q1 00:04): You took only 2 three-pointers in 35 minutes, although at 100% accuracy (2/2), a low volume for a wing position prevents full exploitation of defensive spacing. Action: Increase the number of spotted perimeter shots to at least 4 in the next game. Target: Maintain a minimum of 40% accuracy on a volume of at least 4 shots.
- **Turnovers on offense** (Q1 08:49, Q2 02:54): You recorded 2 turnovers (one from dribbling and one traveling violation) out of 35 minutes on the floor. Action: Minimize unnecessary dribbles in pressure situations and pass the ball in one touch. Target: Finish the game with a maximum of one turnover.

This Week's Practice

1. **The biggest leverage:** Generating perimeter shooting volume. Practice 50 daily catch-and-shoot three-pointers from the corners and the arc, with the goal of raising the number of attempts above 4 per game. Target: At least 40% shooting at the increased volume.
2. Ball handling and turnover prevention. Practice protecting the ball under double pressure for 3 consecutive minutes in training, to avoid dribbling and traveling turnovers. Target: Zero turnovers on individual actions in the pressure zone.

3. Work on diversifying finishing moves inside the paint under physical contact, in order to maintain high conversion percentages (74%) even against dense defense. Target: Maintain 70% or more from 2-point range on at least 20 attempts.
