Vs my average: ▲ **PIR +15.9**

Maintain

- **Absolute efficiency under the basket and in the mid-range:** You made 12 out of 16 two-point shots (75%) and contributed an official plus/minus of +21 while on the court (Q2 07:43, Q3 07:41).
- **Capitalizing on opponent fouls:** You drew 5 fouls and shot 5 out of 5 from the free-throw line (Q1 02:06, Q3 03:24), while maintaining a disciplined game that ended with only 2 personal fouls in 32 minutes of play.

Improve

- **Offensive and defensive rebounding relative to position:** You contributed only 4 rebounds (2 defensive and 2 offensive), a figure in the 59th percentile of the league and 3.2 rebounds below your career average (7.2). Action: Establish an early physical box-out position before the opponent's shot instead of relying on a second reaction. Target: At least 6 rebounds in the next game.
- **Ball control under stint load:** You turned the ball over twice on poor passes in the final quarter (Q4 06:32, Q4 02:24) out of an average stint length of 7.9 minutes. Action: Release the pass out earlier when double-teams begin in the paint during crucial quarters. Target: Maximum of 1 turnover per game.

Drill This Week

1. **The biggest leverage:** Early box-out positioning to increase rebounding volume. Action: Practice blocking opponents with extended arms immediately upon a shot in every internal scrimmage. Target: Minimum of 3 defensive and 2 offensive rebounds in the next game.
2. Quick release of passes from the post-up. Action: Practice kicking the ball out in one touch to the arc or a help cut after a maximum of 2 dribbles. Target: 0 passing turnovers in the paint area.
3. Maintaining concentration during long stints. Action: Practice transition stamina from offense to defense in the final minutes of each half. Target: Maintaining finishing percentages above 75% even in stints exceeding 7 minutes.
