A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **High Efficiency in Paint Finishes:** Excellent 2-point shooting percentage of 71% (70/98) in the window, reflecting precise and focused work under the basket within his core role as a center.
- **Defensive Rebound Consistency:** Stable production of 6.6 rebounds per game on average with low standard deviations, matching the core requirements of the C position.

Improve

- **First-Half Foul Management:** 10 out of 12 fouls this season (42% in quarter 2 and 42% in quarter 3) are concentrated in the middle stages, sometimes leading to critical bench minute restrictions (average 2 fouls per game).
- **3-Point Shot Volume:** Despite 100% (2/2) in the window, the negligible volume does not constitute a significant statistical metric; main energy should be focused solely on interior actions as required by your position.
- **Maintaining Turnover Pace in Quarters 2 and 3:** 8 out of 13 turnovers in the window are concentrated in these quarters (31% in each quarter), indicating a drop in concentration under defensive pressure in the middle of the game.

3-Week Plan

1. **The Biggest Leverage:** 2 fouls accumulated in the first half in some games are limited to overly aggressive defensive action in pick-and-roll. Action: When defending the ball handler, maintain an arm's length distance and do not reach inside the arc. Goal: Finish the first half with a maximum of 1 personal foul.
2. Turnover of 4 balls in quarters 2 and 3 hurts offensive momentum. Action: Execute a short, simple drop-off pass immediately upon grabbing a defensive rebound, instead of dribbling in the congested area. Goal: Reduce turnovers in the middle quarters to less than 0.5 per game.
3. Capitalizing on situations in the paint area during clutch minutes (average 7 points in 2 clutch games with a true shooting percentage of 64.3%). Action: Demand the ball in the low post early in the offensive possession during the last 5 minutes. Goal: Maintain at least 60% success on shots inside the paint in closing minutes.
