Last 10 games · 2026-04-17 to 2026-09-15

Games analyzed: 10 | Position: Small Forward (SF) | Team: National League

Data cross-referenced with the official Israel Basketball Association box score (9 out of 10 games).

Executive Summary

In his weakest quarter of games he produced only 1.5 on average, next to no measurable contribution, against 12.0 for the season and 28.5 on good nights. The average rests on some games, not all of them. Scoring surges in recent matches have elevated his offensive output, though efficiency fluctuates heavily between halves.

A window of 10 games was chosen because below this the average is too noisy (standard error 3.2 points in 5 games vs 2.2 in 10), and above it mixes different periods and roles. Please enable "Background graphics" in your browser print dialog.

To Preserve

- **Elite perimeter conversion rate:** Shooting 51% (25/49) from beyond the arc across the 10-game window places him in the 99th percentile of the league, providing vital floor spacing.
- **Late-window offensive surge:** Averaging 18.7 points and 24.3 PIR over his last 3 appearances, supported by consistent finishing efficiency (86% 2PT on 12/14).

To Improve

- **Foul accumulation in final periods:** Committing 13 out of 34 total personal fouls in the 4th quarter (38%) across the window forces defensive passivity in crunch time.
- **First-quarter offensive passivity:** Scoring only 21 out of 131 total points (16%) in the opening quarter across 10 games, leading to slow starts and early deficits.
- **Turnover vulnerability in middle quarters:** Accumulating 9 turnovers across Q2 and Q3 (5 in Q3 alone) during the last 6 tracked games, disrupting offensive flow.

Three-Week Action Plan

1. **Foul Management:** 13 personal fouls in the 4th quarter across the window forced premature substitutions. Action: Maintain verticality and avoid reaching when defending drivers in the final 6 minutes. Target: Limit 4th-quarter fouls to no more than 1 per game.
2. **First-Quarter Aggressiveness:** 21 points in Q1 (16% of total) show low early involvement. Action: Demand early touches on cuts and transition drives instead of settling for passive perimeter spacing. Target: Raise Q1 scoring output to an average of 4.5 points.

3. **Turnover Reduction:** 9 turnovers across Q2 and Q3 in the last 6 tracked games stall offensive execution. Action: Simplify decision-making on secondary pick-and-rolls, opting for quick pull-ups or designated kick-outs. Target: Reduce total turnovers to under 1.2 per game.
