A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- **High accuracy beyond the 3-point arc:** The player records 51% (21/41) from three in the window, a figure indicating stable and high-quality shooting ability even under load.
- **Defensive rebounding contribution:** The player contributes 3.9 rebounds on average in the window (with stable consistency around 3-5 rebounds on most nights), which serves the demands of the small forward position well.

To Improve

- **Mid-range shot volume management:** 2-point shooting percentage stands at 50% (16/32) in the window but dropped to 43% (3/7) in the last three games. **Action:** Reduce tough pull-up mid-range shots and concentrate on direct drives to the paint defined as the core of your role. **Target:** Increase drive volume for safe finishes and raise success rate on 2s from 50% to 56%.
- **Turnover restraint in crucial quarters:** 9 out of 15 turnovers in the window were concentrated in quarters 2 and 3, hurting team momentum. **Action:** Release the ball earlier in half-court transition and avoid unnecessary dribbling

against double teams. **Target:** Reduce window turnover average from 1.5 to 1.0 per game.

- **Overall productivity index stability:** The seasonal floor stands at only 1.0 PIR on weak nights compared to an average of 9.3 in the window. **Action:** Maintain consistent offensive involvement through movement without the ball even when you don't receive the first shot in the stint. **Target:** Ensure every game finishes with at least 5.0 PIR as a personal baseline metric.

3-Week Plan

1. **The biggest leverage:** Focus on creating outside shooting opportunities out of movement: leverage the 51% (21/41) from three to take at least 4 clean-volume threes in every game this coming week.
2. Perform an internal video analysis of the 15 turnovers recorded in the window and start quick-passing drills under pressure to lower turnovers below 1.0 in the second week.
3. Maintain a dominant presence on defensive rebounding (minimum 3 rebounds per game) while keeping a clean game free of early fouls in the third week.
