Last 7 games · 2024-05-10 to 2026-10-23

Games analyzed: 7 | Position: Point Guard (PG) | Average minutes: 17.7

Data was cross-referenced against the official Basketball Association box score (5 out of 7 games)

Analysis Summary

In his weakest quarter of games, he contributed an average of only -6.0 - almost no measurable contribution - compared to an average of 3.1 in the window and 23.0 on good evenings. This means the average relies on some games, not all of them. His minutes ranged between 2 and 27 · some of the variance is rotation and not the player.

A window of 10 games was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Preserve

- **Passing management and playmaking:** You lead the team in creativity with 3.3 assists on average in the window (78th percentile in the league), and rose to 4.0 assists in the last 3 games. Continue looking for the open player in the pick-and-roll.
- **Consistency in outside shooting:** You maintained 38% (3/8) beyond the arc both in the window and in the last 3 games, a figure indicating stable shooting ability in situations where you are open for a shot.

Improve

- **Reducing extreme fluctuations in minutes and output:** Your playing minutes in the window ranged from 2 to 27, and in 25% of the weak games you contributed a PIR of -6.0. Action: Maintain high focus when entering from the bench to produce a more consistent contribution from the first minute. Target: A positive PIR in every game where you get over 15 minutes.
- **Controlling early fouls:** You average 2.4 fouls per game (and rose to 3.0 in the last 3 games), which limits your participation in the rotation. Action: When defending the ball handler, maintain an arm's length distance and do not make unnecessary reaching hands in the first half. Target: No more than one foul before halftime.
- **Capitalizing at the free throw line:** You shoot only 33% from the line (1/3) in the window. Action: Add 20 personal free throw shots at the end of every practice to

establish this basic skill. Target: Raise the free throw percentage to at least 65% in the next sample.

3-Week Plan

1. **The biggest leverage:** Focus on key passes: Continue to utilize your court vision (3.3 assists) and increase the involvement of your teammates in the offense without getting into dangerous passes. Target: Maintain at least 4.0 assists per game over the next 3 weeks.
2. Tighten defensive discipline and avoid early fouls that send you to the bench. Target: Finish the first half with a maximum of one foul in every game.
3. Improve performance from the free throw line (1/3 in the window) through targeted personal work. Target: Reach at least 60% success on free throw shots in the upcoming official games.
