

Shahar Shalmon

Finals · Round 4 · SG (Shooting Guard) · 14:56 minutes · Maccabi Ashdod vs Hapoel Nahariya · Home Game · Win 94:83 · 2026-06-11

The data was cross-referenced with the official Basketball Association box score

Analysis Summary

The only thing the player must take from the game, proven by the metric: PIR 0 · PIR Percentile 12 · Your 35th best game: Negative efficiency against high three-point volume without hitting the target.

Game Snapshot

Min	PTS	Rebounds	AST	2-Pointers	3-Pointers
14:56 (-4.6)	6 (-0.9)	1 (Def 1, Off 0)	1 (-0.3)	100% (3/3)	0% (0/5)

FT	TO	PF	PIR	±
— (0/0)	0 (-0.0)	4 (+2.1)	0 (-8.0)	-1 (-0.1)

Highlighted cells = Top 25% in the league in this metric.

League percentiles: PIR 12 · PTS 38 · REB 18 · AST 36 · STL 64 · TO 85 · PF 9 | Vs. My Average: Decreasing

Maintain

- **Accuracy in the paint:** You shot 100% (3/3) from the 2-point range (Q1 07:23, Q3 09:13, Q4 01:09), which maintained high efficiency when you chose to drive to the basket instead of shooting from beyond the arc.
- **Zero turnovers:** You finished 14:56 minutes of play without a single turnover (0 turnovers, 85th league percentile), maintaining clean decision-making in passing.

Improve

- **Inefficient three-point volume:** You took 5 three-pointers without hitting (0/5, Q1 05:04, Q2 07:29, Q2 04:45, Q3 09:30, Q4 00:44). This action hurt offensive efficiency and wasted valuable possessions for the team while holding a small lead.
- **Early foul accumulation:** You committed 4 personal fouls in 14 minutes (Q2 07:24, Q2 05:03, Q3 09:48, Q3 08:12), which limited the timing of your stints (average 3.1 minutes per stint) and prevented you from helping during critical game segments.

This Week's Practice

1. **#1 - The Biggest Leverage:** 4 fouls in 14:56 minutes caused your early exit from the game rotation and hurt continuity. The action: When defending an outside player in the opening quarter, maintain an arm's length without creating unnecessary body contact before a declared drive. Target: No more than one foul per half.
2. Perimeter shot selection: 0 out of 5 from three hurt your PIR rating (0). The action: Before shooting from outside, ensure you receive the ball in a Catch & Shoot stance only after a successful screen, and pass the ball on a drive if there is no separation. Target: At least 33% accuracy from over 3 attempts.
3. Mid-stint utilization: Data shows high efficiency in the middle of the stint (2 points, 1/1) and a drop at the beginning and end (0/2 and 0/1). The action: Focus on creating easy scoring through off-ball movement only after the second minute of entering the court. Target: Scoring points in every third segment of the stint.
