

Yam Madar

Last 10 Games · 2026-06-04 to 2026-10-04

Games in Analysis: 10 | Position: Shooting Guard (SG) | Cross-Club Transfer Window (Hapoel IBI Tel Aviv to Maccabi Rapyd Tel Aviv)

Data cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

Yam Madar displays high offensive capabilities in the current window backed by an average efficiency rating of 20.2, but with noticeable variance between periods due to his club transfer and changing role. Professional development depends on stabilizing outside shot volume and minimizing turnovers in crunch-time minutes.

A 10-game window was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Maintain

- **High accuracy beyond the three-point arc with stable volume:** The player records 42% (25/60) from three throughout the window, a core metric in his role as a shooter indicating good decision-making from beyond the arc.
- **Maintaining game discipline and low fouls:** A low foul average of only 1.3 per game (95th league percentile) with zero games with 2 fouls or more in the first 6 minutes of the 1st quarter (0 out of 10), indicates high consistency and the ability to avoid unnecessary contact.

To Improve

- **Sharp decline in offensive production over the last three games:** Scoring average dropped to 9.0 points per game compared to 17.0 for the whole window, alongside a drop in playing minutes (19.0) directly affecting offensive action volume.
- **Volume and accuracy in two-point shooting in the recent period:** 2-point shooting percentage dropped to 44% (4/9) in the last 3 games compared to 54% (29/54) for the entire window, hurting finishing efficiency in the paint.
- **Turnover concentration in middle quarters:** 6 turnovers were recorded in the 3rd quarter (30% of total turnovers in the window), representing a momentary vulnerability in game management and ball retention after halftime.

3-Week Plan

- 1. **The biggest leverage:** 5 fouls in the 3rd quarter (38% of your total fouls) hurt your defensive stability. Action: When defending the ball-handler in the third quarter, keep arm's-length distance instead of initiating early contact. Target: No more than 1 foul in the 3rd quarter.
- 2. 12 cumulative turnovers in the second half (Q3 and Q4 combined) hurt your game management. Action: Release the ball from your hand within the first 4 seconds of the half-court offense without getting caught in unnecessary dribbling. Target: Maximum of 1 turnover in the second half per game.
- 3. 30% from beyond the arc in the last 3 games (3/10) reflects a drop in volume and accuracy. Action: Increase the number of catch-and-shoot shots in movement situations to at least 5 shots per game. Target: Raising the 3-point percentage back to 40% and above.
