A 10-game window was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **Absolute control in the paint and finishing efficiency:** Mitchell maintains a high percentage of 59% (10/17) from the 2-point range and a strong PIR of 27.0 per game, with high consistency and offensive contribution under the rim.
- **High presence in rebounding and clutch minutes:** In the current window, he averages 9.6 rebounds (rising to 11.0 in the last 3 games), alongside quality production in decisive quarters (10 points in 2 games in clutch minutes at a high shooting percentage of 77.6% true shooting).

Improve

- **Foul management in the first quarter:** Mitchell accumulated 2+ fouls in the first 6 minutes of the 1st quarter in 1 out of 2 games reviewed on the event timeline, leading to shortened stints and disrupted game rhythm.
- **Reduction of early turnovers:** 40% of the player's turnovers (2 out of 5) occur in the first quarter, mainly as a result of inaccurate passes at the start of the contest.
- **Outside shot volume:** The 3-point shooting percentage stands at 40% (2/5), but this is a very low volume lacking statistical significance that requires range expansion; he should focus on his core role as a center (finishing in the paint and rebounding).

3-Week Plan

1. **The Biggest Leverage:** 2 fouls in the first 6 minutes of the 1st quarter cost you bench minutes. Action: When guarding the ball-handler in the opening quarter, maintain an arm's length instead of making unnecessary contact. Target: No more than one foul before halftime.

2. **Curbing Opening Turnovers:** 2 turnovers in the 1st quarter out of 5 total turnovers indicate hurried passes. Action: Safe pass to the lead guard before making an interior cut. Target: 0 turnovers in the first quarter over the next 3 games.
3. **Focus on Core Role:** Maintaining 59% (10/17) efficiency on two-pointers. Action: Demanding the ball deep in the paint and avoiding low-volume perimeter shots. Target: Maintain a minimum of 8 rebounds per game and 60%+ under the rim.
