

Nitai Rosenberg

Last 10 Games · 2026-05-15 to 2026-10-16

Games Analyzed: 10 | Position: Small Forward (SF) | Team: Nitai Rosenberg

Data was cross-referenced with the official Basketball Association box score (8 out of 10 games)

Analysis Summary

In his weakest quarter of games, he contributed an average of only 0.0 - with almost no measurable contribution - compared to an average of 9.2 in the window and 22.5 on his best evenings. This means the average relies on certain games rather than all of them.

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **Distance Efficiency and 3-Point Accuracy:** Maintains 51% (19/37) from three in the window with a low standard deviation on evenings where volume is sustained (e.g. 4/8 in the last 3 games), providing a constant perimeter threat as a small forward.
- **Maintaining a Positive Plus-Minus Balance:** Records an average ± index of 6.9 (and 9.7 in the last 3 games), a figure reflecting an efficient collective contribution while on the floor relative to opponents.

Improve

- **Output Consistency and Performance Floor:** Records an average of 0.0 PIR in his weakest quarter of games (out of 10 games), indicating game disappearance on less favorable evenings where he fails to generate an impact.
- **Penetration Volume and Creativity from Core Role:** As a small forward whose main role is driving, 2-point shooting percentage stands at 52% (14/27) but dropped to 0% (0/2) in the last 3 games due to a low number of attempts in the paint.
- **Offensive Production in the Second Half:** Displays a pattern of decline in offensive contribution in quarter 3 where he scores an average of only 1.8 points (17% of total points), compared to a concentration of activity in quarter 2 (46%).

3-Week Plan

1. **The Biggest Leverage:** 52% (14/27) from two reflects underutilization of your core role as a small forward. Action: Increase the number of drives to the basket per stint to at least 4

instead of relying solely on outside shots. Target: Raise shot volume to at least 2 per game under the basket and maintain at least 50% success.

2. Practice active involvement at the start of the second half: The data shows that in quarter 3 you drop to an average of 1.8 points. Action: Create personal initiative in the first two possessions of quarter 3 via a screen and offensive rebounding help. Target: Generate at least one point or assist in every second-half start.
3. Maintain stable involvement even when the ball is not with you: The data shows a floor of 0.0 PIR in a quarter of the games. Action: Focus on defensive rebounding (standing at 4.1 in the window) to stay in the game through off-ball actions. Target: At least 3 defensive rebounds in each first half.
