

Shahar Shalmon

Last 10 games · 2026-05-19 to 2026-09-27

Games analyzed: 10 | Position: Shooting Guard (SG) | Average minutes: 17.7 | Average PIR: 6.1

Data cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

The primary trend in this window indicates high efficiency when finishing from the 2-point range (65% 15/23) alongside a low and ineffective 3-point volume (23% 5/22). In practice, this means functioning as a finisher who concentrates in areas close to the basket, while stepping out to the arc hurts offensive output and requires a readjustment of the shooting profile at the shooting guard position.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	17.7	13.0	▼	27
PTS	4.6	0.7	▼	22
REB	4.8	5.0	▲	69
AST	1.0	0.3	▼	29
2P%	65% (15/23)	50% (1/2)	▲	—
3P%	23% (5/22)	0% (0/3)	▼	—

Metric	Average	Last 3 Games	Trend	League Percentile
Turnovers	0.7	0.3	▲	72
Fouls	2.3	0.7	▲	41
PIR	6.1	5.0	▼	34
±	-0.7	-5.3	▼	43

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles. Please check Background graphics in the print dialog.

Maintain

- **High efficiency within the existing 2-point volume:** Maintain 65% (15/23) on two-point shots by focusing attempts on areas close to the basket and layups, while maintaining consistency as a finisher.
- **Low turnover discipline:** Display consistency with only 0.7 turnovers on average in the window (including 5 games with zero turnovers), indicating small and stable decision-making during most minutes.

Improve

- **Correction of volume and efficiency beyond the arc:** You registered only 23% (5/22) for three-point shots over 10 games, a figure that hurts the core role of the shooting guard. Action: Limit three-point shots to open spot-ups in the corners only and increase personal shooting workouts, aiming to reach at least 33% in the next 15 attempts.
- **Free throw utilization:** You made only 25% (1/4) from the free-throw line in the window. Action: Practice free-throw shooting series at the end of conditioning workouts to build muscle memory under fatigue, aiming to improve the percentage to at least 70% in the next 10 shots.
- **Offensive production in opening minutes:** You recorded poor production in the second half and crunch time (only 2 points out of 46 in quarter 4). Action: Demand greater involvement in set-offense plays across the various quarters and maintain offensive initiative even when minutes shorten, aiming to produce at least 3 points on average in the second half.

3-Week Plan

1. **The biggest leverage:** Focus on fast breaks and layups by capitalizing on the 65% (15/23) from two-point range. Completely avoid difficult three-point shots outside your natural shooting range until your mechanics improve, in order to maintain an accurate metric of scoring in the paint.
2. Work on your free-throw shooting mechanism (1/4 in the window) through regular practice of 50 personal free-throw shots at the end of every workout, aiming to raise success rates above 60% on average over the coming month.
3. Maintain composure on defense and prevent unnecessary fouls at the start of games (2.3 fouls on average), by keeping an arm's-length distance against the offensive player in the first quarter without creating early contact that leads to being benched.

Per-Game Breakdown

Date	Opponent	Min	PTS	REB	AST	PIR
2026-05-19	M.K. Otef Darom	18	3	6	2	1
2026-05-24	M.K. Otef Darom	20	4	6	0	2
2026-05-27	M.K. Otef Darom	21	6	8	2	9
2026-05-31	Ironi Nahariya	17	4	2	1	5
2026-06-04	Ironi Nahariya	27	12	6	1	16

Date	Opponent	Min	PTS	REB	AST	PIR
2026-06-08	Ironi Nahariya	21	9	4	2	13
2026-06-11	Ironi Nahariya	14	6	1	1	0
2026-09-08	Hapoel Midtown Jerusalem	11	0	3	0	1
2026-09-15	Hapoel Altshuler Shahr Dimona	15	2	7	1	11
2026-09-27	Hapoel Ironi Eilat	13	0	5	0	3

Highlighted cells = one of the player's top 5 games this season in this metric (for fouls and turnovers - the lowest).
