Games in Analysis: 10

The data was cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

In his weakest quarter of games he contributed an average of only 1.0 - almost no measured contribution - compared to an average of 10.4 in the window and 20.5 on good evenings. Meaning the average relies on some games, and not all of them.

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it, it mixes different periods and roles. This window crosses a club transition between Elitzur Shomron (5 games) and Hapoel Migdal Jezreel (5 games), and therefore the role changed between the periods.

Maintain

- Maintaining high efficiency in 2-point shots with an average of 62% (28/45) in the window, alongside a positive trend in the last 3 games to 86% (6/7).
- Consistency at a high contribution level on successful evenings, backed by a high stability label from Sela and a spread index indicating that what you get from him is known relative to 54% of players at a similar level.

Improve

- High turnover concentration relative to position, standing at an average of 2.4 turnovers per game over 10 games, with a peak of 8 turnovers in the exhibition game against Maccabi Kiryat Motzkin.
- Drastic drop in production in clutch minutes, with 0 points in 2 games, 0/3 from the field, and 1 turnover in the last 5 minutes of the 4th quarter or overtime.
- Foul control in the second half, where out of 19 fouls in the window, 8 fouls were committed in the 3rd quarter and 5 fouls in the 4th quarter.

3-Week Plan

1. **The Biggest Leverage:** 2.4 turnovers per game in the window hurt your playmaking. Action: Limit the number of dribbles during the offense build-up phase to a maximum of two before passing. Target: Lower the average turnovers below 2.0 per game in the next 3 games.
2. 2 or more fouls in the 3rd quarter recur and limit your presence on the court. Action: In one-on-one defense after the half, keep your hands open and do not create unnecessary physical contact at the midline. Target: Finish the 3rd quarter with no more than 1 personal foul.
3. 0/3 from the field in clutch minutes shows shot selection under pressure. Action: In crunch time, avoid long-range shots and focus on driving for layups or passing to an open player. Target: Make at least one field goal in clutch minutes in the upcoming games.
