

Niv Lampert

Last 10 games · 2026-04-24 to 2026-08-05

Games analyzed: 10 | Position: Point Guard (PG)

Data cross-referenced with the official Basketball Association box score (8 out of 10 games)

Analysis Summary

In his quarter of weakest games, he contributed an average of only 1.0 - almost no measurable contribution - compared to an average of 11.5 during the window and 26.5 on good evenings. This means the average relies on some games, not all of them. His minutes ranged from 6 to 34 · Some of the variance is due to rotation rather than the player.

Window Overview (Last 10 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	19.5	25.7	▲	44
Pts	8.7	12.0	▲	59
Reb	3.4	3.0	▼	52
Ast	4.1	7.3	▲	84
2P%	64% (16/25)	45% (5/11)	▼	—
3P%	38% (9/24)	50% (2/4)	▲	—
Turnovers	2.1	2.7	▲	24
Fouls	2.6	2.7	■	18
PIR	11.5	18.3	▲	67
±	0.7	-6.0	▼	54

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- **Playmaking and Creating Opportunities:** Averages 4.1 assists during the window (84th percentile), with a peak of 7.3 assists in the last 3 games and high consistency in key passes against pressure defenses.
- **Interior Scoring:** Maintains high efficiency of 64% (16/25) on two-point shots during the window, utilizing core point guard drives for safe points in the paint.

To Improve

- **Turnover Control and 4th Quarter Focus:** Recorded 2.1 turnovers per game in the window (with 47% concentrated in the final quarter), which harms game management in clutch minutes. Action: Limit unnecessary transition dribbles during crunch time and move the ball early to the guard alongside you. Target: Drop below 1.5 turnovers per game in the next 3 games.
- **Consistency and Minimizing Extreme Rotation Fluctuations:** Performance floor stands at only 1.0 PIR on weak nights compared to a ceiling of 26.5 PIR (minutes ranging between 6 and 34). Action: Maintain constant offensive involvement even when not receiving the first ball in the set. Target: Ensure a minimum floor of 5.0 PIR every game night.
- **Free Throw Accuracy:** Shoots only 59% (10/17) from the line in the window (dropping to 40% (2/5) in the last 3 games). Action: Add a regular free throw shooting session at the end of every individual workout to stabilize mechanics under fatigue. Target: Raise free throw percentage to at least 75%.

3-Week Plan

1. **Week 1 - Focus on Crunch Time Concentration:** Practice quick decision-making under pressure in the 4th quarter with the goal of reducing turnovers to an average of 1.5 per game.
2. **Week 2 - Improving Free Throw Percentage:** Execute a session of 50 targeted free throws at the end of every workout to climb from the 59% (10/17) level towards 75%.
3. **Week 3 - Stabilizing Production in Short Stints:** Maintain consistent offensive contribution (minimum 5 PIR) even in games where minutes drop below 20 minutes.

Multi-Season Development

2023-2024 (Leumit): 17 pts, 6 reb, 2 ast, 3pt 2/10.
2024-2025 (Leumit Cup): 12 pts, 5 reb, 3 ast, 3pt 2/4.
2024-2025 (Leumit): 186 pts, 80 reb, 93 ast, 3pt 24/69 (21 g, 8.9 pts/g).
2025-2026 (Leumit Cup): 18 pts, 10 reb, 12 ast, 3pt 2/9.
2025-2026 (Leumit): 282 pts, 113 reb, 129 ast, 3pt 33/99 (23 g, 12.3 pts/g).

Per-Game Breakdown

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-04-24	Maccabi Ma'ale Adumim	23	9	6	3	11
2026-04-28	א.ס. רמת השרון ירק השדה	17	8	1	0	2
2026-05-08	Maccabi Petah Tikva Elitzur	19	11	4	0	11
2026-05-12	A.S. Ashkelon / Kiryat Gat	13	5	2	2	4
2026-05-15	Elitzur Yavne	6	2	1	0	0

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-05-19	Maccabi Haifa	18	7	3	5	8
2026-05-24	Maccabi Ma'ale Adumim	22	9	8	9	24
2026-05-27	Hapoel Safed / Galil Daniel	21	18	6	6	21
2026-07-20	Hapoel Nahariya — הפועל מגדל העמקִזרעאל - IBBA	34	16	3	10	29
2026-08-05	IBBA - הפועל מגדל העמקִזרעאל — אליצור יבנה	22	2	0	6	5

Bold cells = one of the player's top 5 games this season in this metric (for fouls and turnovers - lowest).
