50% (2/4)	0 (—)	1 (-0.3)	8 (-2.2)	+3 (—)

Highlighted cells = Top 25% in the league for this metric.

League Percentiles: PIR 46 · Pts 43 · Reb 47 · Ast 12 | vs My Average: Decreasing

To Preserve

- Precise opportunity utilization beyond the arc with an accurate three-pointer in real-time and alert defensive contribution (Q1 02:38, Q2 02:26).
- Maintaining a zero turnover balance across 12 minutes of play and correct foul management (Q1 03:16, Q2 08:34).

To Improve

- Low shooting volume from 2-point range · 33% (1/3) and missing two field goal attempts · hurt the ability to generate a scoring run and cost the team points in the second stint (Q3 00:48, Q3 00:08).
- Drop in key passes and assists · 0 assists vs. a career average of 4.1 · halted the ball-movement flow on offense and made it difficult to create easy looks for teammates (Q3 02:36).

This Week's Practice

1. **#1 - The Biggest Leverage:** 2 mid-range and paint misses out of only 3 attempts limited your scoring output to 7. Action: Increase the number of drives to the paint in individual shooting workouts and practice shooting off movement with contact. Target: At least 5 shot attempts in the paint area in the next game.
2. 0 assists were recorded in 12 minutes of play compared to a career average of 4.1. Action: In transition offense and pick-and-roll situations, look for the secondary pass to the open player in the corner instead of finishing alone. Target: At least 2 assists in a half in the next game.
3. 50% free throw accuracy (2/4) and missing 2 critical free throws. Action: Add 30 free throws at the end of every team practice under fatigue conditions. Target: Over 75% accuracy from the line in the next game.
