Last 10 Games · 2026-05-21 to 2026-10-16

Games analyzed: 10 | Position: Shooting Guard (SG) | Clubs in window: Ironi Nahariya / A.S. Ramat HaSharon

Data cross-referenced with the official IBBA box score (6 of 10 games)

## Analysis Summary

The club transition from Nahariya to Ramat HaSharon produced a notable output leap from an average of 9.6 points in the window to 14.3 points and 5.0 assists in the last 3 games, indicating a significant role expansion at the creative shooting guard position. In his lowest quartile of games, he contributed an average of only 0.5 – virtually no measurable contribution – compared to an average of 9.5 in the window and 21.0 on his best nights, so consistency remains the primary challenge alongside increasing turnover volume in decision-making (3.7 turnovers per game recently).

## Window Overview (Last 10 Games)

| Metric | Average | Last 3 Games | Trend | League Percentile |
|---|---|---|---|---|
| Minutes | 27.6 | 32.3 | ▲ | 75 |
| Points | 9.6 | 14.3 | ▲ | 59 |
| Rebounds | 2.7 | 3.0 | ▲ | 38 |
| Assists | 2.7 | 5.0 | ▲ | 59 |
| 2PT% | 72% (13/18) | 100% (2/2) | ▲ | — |
| 3PT% | 56% (14/25) | 71% (5/7) | ▲ | — |
| Turnovers | 1.9 | 3.7 | ▼ | 30 |
| Fouls | 2.1 | 2.7 | ▼ | 46 |
| PIR | 9.5 | 13.0 | ▲ | 46 |
| ± | -2.8 | 3.3 | ▲ | 14 |

A 10-game window was selected because below this the average is too noisy (standard error of 3.2 points across 5 games vs. 2.2 across 10), and above it mixes different periods and roles.

## To Maintain

- **High-volume perimeter shooting efficiency:** In the analyzed window, you recorded 56% (14/25) from 3, jumping to 71% (5/7) in the last 3 games. This high accuracy provides vital floor spacing and ensures reliable anchor offensive production.
- **Playmaking and assist distribution in an expanded role:** A surge from an average of 2.7 assists in the window to 5.0 assists per game in the recent stretch, including a season-high 8 assists against M.K. Otef Darom (2026-10-16), demonstrating excellent decision-making on the ball.

## To Improve

- **Ball security in the second quarter and transition situations:** You recorded a sharp increase to 3.7 turnovers per game in the last 3 games (compared to a

1.9 average in the window). 67% of your turnovers occur in the second quarter (6 out of 9 recorded turnovers), mostly resulting from bad passes and lost balls off the dribble, costing 4 to 6 valuable possessions per game.

- **Free throw accuracy percentage:** Standing at just 50% (3/6) from the free throw line across the 7 games documented in the play-by-play. An SG shooter of your caliber must capitalize on easy points when drawing contact on drives, especially on nights when outside shots aren't falling.
- **Drive volume and capitalizing on 2-point efficiency:** Although shooting 72% (13/18) from 2-point range in the window, volume is very low (only about 2.5 attempts per game). Shying away from additional drives leaves high interior efficiency underutilized.

## 3-Week Plan

- 1. **The biggest lever: Second-quarter ball management and turnover reduction:** Identify lapses in concentration during the second quarter. Make simple passes to primary passing lanes and avoid overdribbling in traffic. Target: A maximum of one turnover in the entire first half, bringing the average below 2.0 turnovers per game.
- 2. **Free throw routine and consistency:** Practice 50 free throws at the end of each practice session under fatigue. Target: Increase free throw percentage from 50% (3/6) to at least 75% over the next 3 games.
- 3. **Increasing drive volume to the paint:** Increase paint attacks and mid-range pull-up jumpers from 2.5 attempts to 5.0 2-point attempts per game, while maintaining at least a 55% field goal percentage.

## Game-by-Game Breakdown

| Date | Opponent | Min | Pts | Reb | Ast | PIR |
|---|---|---|---|---|---|---|
| 2026-05-21 | Elitzur Shomron | 26 | **18** | 1 | **2** | **18** |
