Last 10 games · 2026-05-23 to 2026-10-16

Games analyzed: 10 | Position: Small Forward (SF) | Club move: Maccabi Tapuzina Rishon LeZion (4 games) ← Ironi Nahariya (6 games)

Data cross-referenced with the official Basketball Association box score (9 out of 10 games)

Analysis Summary

Stevens exhibits a sharp offensive upward trend in the recent window, reflected in a weighted efficiency rating of 25.3 PIR per game. The move to Ironi Nahariya changed his role and increased his volume to an average of 27.7 points in the last 3 games, but simultaneously requires tighter control over fouls and load management across all four quarters.

A 10-game window was chosen because anything below that makes the average too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **High scoring efficiency in the paint:** Shooting 71% (70/98) on two-pointers throughout the window, with high stability also in the last 3 games (66% (21/32)), indicating excellent shot selection from close range.
- **Offensive output consistency:** An average PIR of 25.3 (and 31.7 in the last 3 games) achieved with low standard deviations relative to the high scoring volume (21.2 per game).

Improve

- **Turnover concentration in middle stages:** 8 out of 13 total turnovers in the window are concentrated in quarters 2 and 3 (31% in each quarter), which creates halts in the team's offensive momentum.
- **Foul accumulation in the first half:** 10 out of 12 window fouls (84%) were accumulated in quarters 2 and 3, hurting his availability for clutch minutes.
- **Outside shot volume:** Shooting only 100% (2/2) beyond the arc across the entire window indicates too low a volume for a small forward, preventing the spacing of packed defenses.

3-Week Plan

1. **The biggest leverage:** 70/98 two-point makes (71%) prove superiority in the paint. Action: Increase the number of deep drives to at least 10 per game while maintaining body angle against help defense. Target: Maintain a minimum of 68% success from this range.
2. Early foul management: 5 fouls accumulated in quarter 2 and 5 more in quarter 3. Action: In 1-on-1 defense in the first half, avoid contact on the lateral line and maintain arm's length distance. Target: Drop to a maximum of 1 foul by halftime in every game.
3. Reducing turnovers in transition: 4 turnovers in quarter 2 and 4 in quarter 3. Action: Release the ball with a quick first pass instead of unnecessary dribbling against a double-team. Target: Lower the monthly average of turnovers below 1.2 per game.
