Niv Lempert

Last 10 Games · 2026-05-24 to 2026-10-16

Games Analyzed: 10 | Position: PG | Role: Point Guard

Data cross-referenced with official Israel Basketball Association box scores (6 out of 10 games).

Executive Summary

Niv Lempert displays elite playmaking and defensive activity during the window, anchored by 3.6 assists and 1.1 steals per game despite a mid-window club transition. However, late-game turnover spikes and low scoring efficiency require refined shot selection and tighter ball security in the final quarters.

A window of 10 games was selected because below this sample size the averages are too noisy (standard error 3.2 points across 5 games versus 2.2 across 10), and above it mixes distinct club stints and role changes. Note: This window crosses a club transition from Hapoel Migdal Jezreel (2 games) to Maccabi Rehovot (4 games) plus preseason action, altering his core responsibilities.

To Preserve

- **Playmaking Vision:** Maintaining 3.6 assists per game (73rd percentile) and peaking with a 10-assist performance against Ironi Nahariya / Hapoel Migdal Jezreel, showing high-level court mapping within his primary PG responsibilities.
- **Perimeter Efficiency & Steals:** Delivering 43% from beyond the arc (6/14) alongside 1.1 steals per game (72nd percentile), proving active hands and reliable spot-up floor spacing.

To Improve

- **Fourth-Quarter Ball Security:** 67% of his total turnovers (8 out of 12) occur in the 4th quarter across the 8-game tracking sample, heavily impacting late-game execution and decision-making under pressure.
- **Scoring Volatility:** Points drop sharply from 7.4 per game across the window down to 4.7 in the last 3 games, driven by declining minutes (13.7) and a drop in 3-point accuracy to 25% (1/4).

- **Free Throw Conversion:** Shooting 53% from the line (9/17) across 8 games with tracking, leaving easy points off the board during high-contact possessions.

3-Week Development Plan

1. **The Biggest Lever:** 8 of your 12 window turnovers occurred in the 4th quarter. Action: In late-game possessions, utilize two-handed push passes instead of bounce passes through traffic and avoid high-risk dribble penetration when trapped. Target: Reduce 4th-quarter turnovers to zero in the next 3 games.
2. **Free Throw Mechanics:** Your 53% FT conversion (9/17) costs critical points. Action: Commit to a mandatory 50-shot free-throw routine after every team practice, focusing on consistent leg bend and routine release. Target: Raise free-throw percentage to 75%+ over the next 3 games.
3. **Shot Selection & Volume:** You are shooting 43% from 3-point range (6/14) but take less than 2 attempts per game. Action: As a PG, actively hunt one additional kick-out or pull-up perimeter shot per game when operating off pick-and-rolls. Target: Increase 3-point volume to 3+ attempts per game while maintaining 35%+ accuracy.
