

Marcus Tyus

Last 5 games · 2026-09-23 to 2026-10-23

Games analyzed: 5 · Position: Shooting Guard (SG) · Minutes in window: 28.2 per game

Data cross-referenced with the official Basketball Association box score (5 out of 5 games)

Analysis Summary

The player demonstrates stable offensive output in the window with an average PIR of 15.4 and 14.4 points per game, alongside an improving trend in passing and efficiency rating in recent games. The data points to the need to increase perimeter shot volume and improve foul management to produce more consistent contributions across all four quarters.

Window Overview (Last 5 Games)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	28.2	30.0	▲	—
Points	14.4	14.3	■	—
Rebounds	3.2	3.7	▲	—
Assists	4.4	4.3	■	—
2P%	100% (4/4)	100% (4/4)	■	—
3P%	50% (3/6)	50% (3/6)	■	—
Turnovers	4.6	5.0	▼	—
Fouls	2.6	2.7	▼	—
PIR	15.4	15.0	■	—
±	-6.0	-15.7	▼	—

A 10-game window was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Maintain

- **High Two-Point Efficiency:** The player shoots 100% (4/4) from the two-point range in the current window, indicating precise shot selection on finishes inside.
- **Playmaking Contribution:** An average of 4.4 assists per game in the window with a high of 7 assists in the game against A.S. Ashkelon / Kiryat Gat, while maintaining consistency in passing.

To Improve

- **Perimeter Shot Volume:** The player took only 6 three-pointers in all 5 games of the window (making 3/6, which is 50%), a low volume for the shooting guard position that requires increasing the number of long-range shots to pressure the defense.
- **Turnover Control:** An average of 4.6 turnovers per game in the window, including a high of 8 turnovers in the game against Ironi Ashkelon, which generate stops on offense.
- **Second-Quarter Output:** The player averages 0.0 points in the second quarter (0% of total points), pointing to an offensive stall in the first half of the game.

3-Week Plan

1. **The Biggest Lever:** Reducing passing turnovers. A figure of 4.6 turnovers per game hurts team efficiency. Action: In transition and off screens, pass only on direct sight and avoid risky passes in congested spaces. Target: Lower the turnover average below 3.0 per game.

2. Increasing three-point shot volume. A figure of only 6 shots in 5 games (50%, 3/6) does not reflect the core role of a shooter. Action: Personal work day aimed at taking at least 4 perimeter shots in every game. Target: Establish at least 4 three-point attempts per game at a percentage exceeding 38%.

3. Foul management in the early quarters. A figure of 5 fouls in the game against Elitzur Yavne hurts court presence. Action: Maintain arm-length distance when defending the ball handler in the opening minutes without making unnecessary contact. Target: Keep to a maximum of 1 foul in the first half.

Per-Game Breakdown

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-09-23	M.K. Otef Darom (Preseason)	21	**14**	**4**	3	**15**
2026-09-27	Ironi Ashkelon / A.S. Ashkelon / Kiryat Gat (Preseason)	30	**15**	1	**6**	**17**
2026-09-30	Elitzur Yavne (Preseason)	28	**15**	**5**	4	11

Date	Opponent	Min	Pts	Reb	Ast	PIR
2026-10-16	Ironi Ashkelon	**33**	7	3	2	5
2026-10-23	A.S. Ashkelon / Kiryat Gat	29	**21**	3	**7**	**29**
—	—	—	—	—	—	—

Highlighted cells = one of the player's top 5 games this season in this metric (for fouls and turnovers - the lowest).
