To Preserve

- **Efficiency on drives and drawing fouls in the paint:** 100% on 2-pointers (1/1) alongside 2/2 from the free-throw line, producing 4 quick points in just 2 minutes in the first quarter (Q1 01:32, Q1 00:21).
- **Reading passing lanes on defense:** 1 steal at the point guard position that translated into stopping an opponent possession at the start of the fourth quarter (Q4 09:46).

To Improve

- **Playmaking at the point guard position:** 0 assists in 14 minutes of play, a metric significantly below career average (3.8 assists) placing you in the 12th percentile only, which limited the team's offensive flow that stalled at only 64 points (Q2 08:52).
- **Shot selection at the end of the game:** 0% beyond the arc (0/3 from three), all recorded within a 3-minute span in the fourth quarter while the deficit grew from 12 to 21 points, instead of returning to the core role of attacking the paint (Q4 09:30, Q4 06:35, Q4 06:31).
- **Pace control and stability across stints:** A drop in the fatigue metric from 100% shooting and 2 points at the start of a stint to 0% later on, coupled with a turnover and a foul within 24 seconds in the second quarter that narrowed the lead from 7 to a single point (Q2 08:52, Q2 08:28).

Weekly Drills

1. **The biggest leverage point:** 0 assists in 14 minutes of play indicate clogged ball movement at the number 1 position. Practice reading help defense in pick-and-rolls and kick-out passes to the corners after driving to the paint. Target: A ratio of at least 3 assists per turnover in the next game.
2. 0-for-3 from three in the fourth quarter resulted in 3 consecutive possessions without points. Practice decision-making in transition and execute rim attacks or ball distribution instead of settling for early jump shots beyond the arc. Target: Zero pull-up three-pointers without a numerical advantage, and a minimum of 3 drives to the paint to generate points or fouls per quarter.
3. A turnover and a foul within 24 seconds in the second stint cost a 5:0-run by the opponent. Practice no-contact defense under workload and safe outlet passes under pressure from an opposing guard. Target: No more than a single turnover and one foul per 15 floor minutes.
