Analysis Summary

Gal Baitner demonstrates significant improvement in offensive efficiency and passing volume in the current window, as evidenced by his rise to 4.1 assists per game and a plus-minus rating of +7.0. The practical significance is a release of offensive pressure and high leadership ability in key games, culminating in a season-high 23 PIR against Elitzur Shomron.

A 10-game window was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **Game management and high assist distribution:** You maintain great consistency in passing the ball to create opportunities for teammates, with an average of 4.1 assists per game and a low standard deviation between matchups.
- **Consistent positive contribution in plus-minus:** You display a positive team balance of +7.0 on average in the window, which indicates a useful presence on the court even when individual scoring contribution varies.

Improve

- **Low shot volume from beyond the arc:** You shot 29% (4/14) from three in the current window over 6 games, a sample indicating hesitation and a need to generate higher shot volume to become a consistent threat outside the arc.
- **Limited efficiency in crunch time quarters:** You recorded only 2 points in 4 games and a 25.0% true shooting percentage in the last 5 minutes, which lowers your game-closing effectiveness.

- **Maintaining foul discipline:** You accumulate an average of 3.0 fouls per game with a high concentration in quarters 2 and 3, which hurts your ability to stay on the court in critical late-game minutes.

3-Week Plan

1. **The biggest leverage:** 4.1 assists per game prove your court vision. Action: Increase the number of risky and direct passes to the post and slashers in the next 2 games. Target: Maintain at least 5 assists per game without increasing turnovers.
2. 2 turnovers on average per game hurt the offensive flow. Action: Avoid unnecessary dribbling in the pressure area in the opponent's half-court and release the pass in the first second upon identifying coverage. Target: Reduce to no more than 1 turnover per game over the next 3 weeks.
3. 29% (4/14) from three shows a need to improve volume. Action: Shoot at least 3 well-managed three-pointers in every practice and upcoming games when you receive the ball open beyond the arc. Target: Increase three-point percentage to 35% and above at a volume of at least 3 shots per game.
