A 10-game window was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- High accuracy in outside shooting with 51% (20/39) cumulatively in the window, alongside an upward trend in the last 3 games standing at 60% (9/15).
- Consistent positive contribution in the plus-minus rating averaging at +10.8 across all games and rising to +16.0 in the last 3 games.

To Improve

- A drop in point production as the game progresses, with the window recording 37 points in the first quarter compared to only 10 points in the fourth quarter out of 9 games with a play-by-play log.
- Low assist numbers averaging 0.8 in the window, with 0 total assists recorded in the last 3 games.
- Low production in clutch minutes, averaging 4 points in 4 games and a 33.3% true shooting percentage in the last 5 minutes of the 4th quarter or overtime.

3-Week Plan

1. **The Biggest Lever:** 51% (20/39) from three shows high efficiency on existing volume. Action: Increase outside shot volume in catch-and-shoot situations beyond the arc without unnecessary dribbling. Target: Reach an average of 5 three-point shots per game while maintaining at least 45% success.

2. Early foul management in the opening phase. Action: When defending the ball handler in the first quarter, maintain arm's length instead of making unnecessary physical contact in the first 6 minutes. Target: Maintain no more than 1 foul in the first half of each game.
3. Offensive contribution in crunch time. Action: Perform off-ball movement toward the corners of the court in the last 5 minutes of the game to create easy passing options for the team. Target: At least 1 successful shot out of clean shot selection in clutch minutes.
