

Nitai Rosenberg

Last 10 games · 2026-05-12 to 2026-10-16

Games analyzed: 10

Data cross-referenced with the official Basketball Association box score (7 out of 10 games)

In his weakest quarter of games, he contributed an average of only 1.0 - almost no measurable contribution - compared to an average of 9.4 in the window and 22.5 on his best nights. This means the average relies on some games, not all of them.

Analysis Summary

The current window is characterized by extreme variance between game nights, with offensive production relying on momentary determination and outside shooting alongside disappearing in certain games. The primary goal is to upwardly stabilize the performance floor and avoid getting into early foul trouble to maintain continuity in the game.

Numbers by range

Last 5 | Last 10 | Last 30

Window Overview (Last 10 games · 2026-05-12 – 2026-10-16)

Metric	Average	Last 3 Games	Trend	League Percentile
Minutes	20.6	20.0	■	50
PTS	10.3	9.3	▼	67
REB	4.1	2.0	▼	59
AST	1.4	1.7	▲	41
2P%	52% (16/31)	60% (3/5)	▲	31
3P%	47% (20/43)	55% (6/11)	▲	—
Turnovers	1.6	0.3	▼	40
Fouls	2.7	2.7	■	13
PIR	9.4	8.7	▼	53
±	4.9	1.0	▼	85

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

To Preserve

- High three-point shooting percentage standing at 47% (20/43) throughout the window, with a slight improvement to 55% (6/11) in the last three games, indicating high efficiency in spotting up and from beyond the arc.
- Maintaining a positive plus-minus rating of +4.9 on average across 7 games and very low turnovers in the last three games (0.3 per game), indicating deliberate decision-making and maintaining a positive pace for the team.

To Improve

- Very low performance floor: in a quarter of your weakest games you contributed only 1.0 PIR on average, which indicates complete disappearance on certain nights and reliance on sporadic flashes.
- Foul trouble in crunch time: 10 out of 27 fouls this season (37%) were committed in the fourth quarter, hurting the ability to stay on the floor in deciding minutes.
- Turnover concentration in the first half: 7 out of 16 turnovers this season (43%) were concentrated in the second and third quarters, hurting team momentum in critical transition phases.

3-Week Plan

1. **The biggest leverage:** 2.7 fouls on average in the window, with 37% of them concentrated in the fourth quarter. Action: In one-on-one defense in the decisive quarter, maintain arm's length and avoid unnecessary contact in the first seconds of the opponent's offense. Target: Finish recent games with fewer than 2 fouls in Q4.
2. Outside shot volume: 47% (20/43) from three shows excellent accuracy but requires expanding volume. Action: Create at least 4 open mid-range and three-point shots for yourself every game through off-ball movement. Target: Maintain a minimum of 40% accuracy on a volume of 5 shots per game.
3. Ball-handling focus: 1.6 turnovers per game with a high concentration in the middle quarters. Action: Make a quick first pass in transition and avoid unnecessary dribbling against aggressive pressure. Target: Reduce turnovers to a maximum of one per night.

Per-Game Breakdown

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-05-12	A.S. Ashkelon / Kiryat Gat	**21**	7	4	**3**	2
2026-05-15	Elitzur Yavne	**24**	**16**	**5**	0	14
2026-05-19	Maccabi Haifa	18	10	**6**	0	6
2026-05-24	Maccabi Ma'ale Adumim	**20**	13	**5**	2	16
2026-05-27	Hapoel Zefat	23	**20**	**5**	**3**	**27**

Date	Opponent	MIN	PTS	REB	AST	PIR
2026-09-18	Elitzur Yavne (Exhibition)	20	9	3	0	3
2026-09-23	Hapoel Hevel Modiin	20	0	**7**	1	0
2026-09-30	Maccabi Mendel Petah Tikva (Exhibition)	**23**	**14**	2	**4**	**18**
2026-10-04	Elitzur Yavne (Exhibition)	17	6	2	0	3
2026-10-16	Maccabi Kiryat Motzkin	20	8	2	1	5

Highlighted cells = one of the player's top 5 games this season in this metric (for fouls and turnovers - the lowest).
