Games analyzed: 10 | Position: PG | Role: Starting Point Guard

Data reconciled against the official Israeli Basketball Association box scores (7 out of 10 games).

Executive Summary

In his weakest quarter of games he produced only 0.5 on average, next to no measurable contribution, against 10.5 in the window and 26.5 on good nights. The average rests on some games, not all of them. His minutes ranged from 6 to 34 · part of the spread is rotation, not the player.

Window Overview (Last 10 games)

Metric	Average	Last 3 Games	Trend	League Percentile
MIN	18.5	23.0	▲	39
PTS	8.3 (83/10)	7.7	▲	53
REB	3.0	1.7	▼	50
AST	3.9	5.7	▲	84
2P%	58% (14/24)	20% (1/5)	▼	—
3P%	39% (9/23)	33% (1/3)	▲	—
TO	1.9	2.0	■	28
PF	2.7	3.7	▼	17
PIR	10.5	11.7	▲	63
±	-2.0	-10.0	▼	37

A window of 10 games was chosen because below that the average is too noisy (standard error 3.2 points in 5 games vs 2.2 in 10), and above it mixes different periods and roles. His minutes ranged from 6 to 34 · part of the spread is rotation, not the player.

To Preserve

- **Elite Playmaking Vision and Execution:** Averaging 3.9 assists overall with a massive surge to 5.7 in the last 3 games, sitting at the 84th percentile league-wide. Consistency is anchored by elite passing displays, peaking with 10 assists against Hapoel Nahariya.
- **Efficient Perimeter Volume:** Converting 39% (9/23) from beyond the arc across the window. This floor-spacing threat forces defenses to respect his shot, opening driving lanes for his playmaking.

To Improve

- **Scoring Volatility and Weak Quarters:** In his weakest quarter, production drops to 0.5 PIR, highlighting severe inconsistency linked directly to rotational fluctuations (minutes ranging from 6 to 34).
- **Foul Accumulation in Late Quarters:** Committing 48% of his total fouls (11 out of 23) in the 4th quarter, leading to defensive liability and shortened closing stints.
- **Fourth-Quarter Turnover Spikes:** Accumulating 59% of his total turnovers (10 out of 17) in the final period, indicating fatigue or high-pressure ball-handling strain down the stretch.

3-Week Action Plan

1. **Foul Discipline Management:** 4 fouls per game recently and 11 fouls in 4th quarters cost you closing minutes. Action: In defensive stance against the ball-handler in quarters 3 and 4, maintain arm-length distance instead of reaching. Target: Maximum 1 foul in the second half.
2. **Turnover Reduction Under Pressure:** 10 turnovers in 4th quarters compromise team leads. Action: Utilize early pick-and-roll resets and quick ball-releases rather than over-dribbling into traps. Target: No more than 1 turnover per 4th quarter.
3. **Shot Selection & Volume Balance:** 20% (1/5) from 2-point range in the last 3 games shows forced finishing inside. Action: Prioritize driving-and-dishing or floater range over contested layups against heavy rim protection. Target: Raise 2-point conversion back above 50% through cleaner shot selection.
