

Ryan Turell

Regular Season · Round 4 · SF · 35 mins · Maccabi Mendel Petah Tikva vs. Elitzur Shomron · 2026-11-06

Analysis Summary

Your best game out of 30 recent games 30 matches, with an efficiency rating indicating absolute dominance on offense and presence in the paint. PIR 48 · PIR Percentile 100 · Your best game out of 30 recent games 30 matches

Game Snapshot

📊 Your best game out of 30 recent games

MIN	PTS	REB	AST	STL	BLK
35	42	10	3	0	0
+11.9	+31.1	+6.2	+1.3	-0.7	-0.1

PIR	TOV	PF	±
48	2	3	+22
+38.2	+1.1	+0.6	

Highlighted = a standout number: league top 25% or well above your average. Small number = difference from your average.

League percentiles (vs 5305 league game lines)

Vs my average: ▲ **PIR +38.2**

Maintain

- **Volume and Accuracy on 2-Pointers:** You finished with 74% (17 out of 23) on 2-point shots, maintaining stability across stints (71% early stint, 80% mid stint). This was reflected, among other things, in consecutive scoring plays such as a driving layup (Q1 00:48) and a pull-up jumper (Q4 07:37).
- **Defensive Rebound Involvement:** You contributed 9 defensive rebounds out of 10 total, utilizing height and proper positioning under the rim, including during critical minutes (Q2 08:06, Q4 04:58).

Improve

- **Early Quarter Foul Management:** You accumulated personal fouls in the early stages of quarters (Q1 01:19, Q2 02:40, Q4 05:08), which limited continuous playing time in stints. Action: When defending the ball handler, maintain arm's length distance and avoid direct contact on early drives. Target: No more than one foul per half.
- **Reducing Dribble Turnovers:** You recorded 2 turnovers in the game, including a dribble turnover (Q1 08:49) and a traveling violation (Q2 02:54). Action: Release the ball with a quick pass when double-teamed in the free-throw line area. Target: Zero turnovers in your personal zone in the next two games.
- **Maintaining Activity Volume at End of Stint:** A drop in production was recorded toward the end of the stint with 60% shooting (3 out of 5) compared to 80% in the middle of the stint, alongside an average stint length of 10.9 minutes (Q2 01:53, Q4 01:40). Action: Call for a switch or accelerate ball movement instead of taking tough shots under fatigue. Target: Maintain a minimum of 70% success even in the final minutes of the stint.

This Week's Practice

1. **The Biggest Lever:** Practice quick decision-making under double-team pressure at the free-throw line to reduce turnovers on dribble and travel plays.
2. Practice maintaining arm's length distance in one-on-one defensive situations during the first six minutes of each half to prevent early foul accumulation.
3. Practice pull-up jump shots under progressive physical load to improve shooting percentages in the closing minutes of each stint.
