Games in analysis: 10 · Position: Shooting Guard (SG)

Data cross-referenced with the official Basketball Association box score (10 out of 10 games)

Analysis Summary

The player shows a clear offensive improvement trend in points and efficiency, averaging 9.0 points in the last 3 games compared to 6.1 across the entire window. This means a significant increase in volume and offensive capability, despite high volatility where in a quarter of the games he is barely felt.

A 10-game window was chosen because below that the average is too noisy (standard error of 3.2 points in 5 games vs. 2.2 in 10), and above it mixes different periods and roles.

Maintain

- **High accuracy on 2-point shots:** The player records 60% (18/30) from the field in the window, a figure that rose to 100% (7/7) in the last 3 games, indicating smart shot selection at close range.
- **Maintaining a low turnover count:** An average of only 0.9 turnovers per game in the window (dropping to 0.3 in the last 3 games), indicates stable and deliberate decision-making under pressure.

Improve

- **Volume and accuracy in outside shooting:** Shooting 26% (7/27) from 3-point range over 10 games is an obstacle in the core role of a shooter; Action: Increase personal training volume on catch-and-shoot shots from the corners of the court. Target: Reach at least 33% in the next 10 games.
- **Consistent contribution throughout game flows:** The player contributes an average of only 0.5 PIR in his worst quarter of games (vs. 14.5 in his best). Action: Maintain constant and productive offensive involvement even at the start of the second half. Target: Minimum 4.0 PIR in the hardest quarter of games.
- **Free throw percentage:** The player is at only 50% (4/8) from the free throw line in the window. Action: Practice regular free throws at the end of every physical training session under fatigue. Target: Improvement to 70% and above in upcoming opportunities.

3-Week Action Plan

1. Week 1: Focus on improving the 3-point shooting mechanism through targeted catch-and-shoot drills (target: 35% in personal shooting workouts).
2. Week 2: Work on an aggressive and focused game start to prevent disappearing in the first quarters (target: at least 2 positive plays in Q1 every game).
3. Week 3: Strengthen concentration at the free throw line under physical load (target: at least 70% success in practice and games).
